1. Fees can be entered in **Settings > Hospital > Fees Setup**

2. For multi location databases, ensure the correct **Location** is selected
3. Use the **Fund** drop down to select the required health fund
4. The **Start of Current Fee** date indicates the date that the **Current Fees** will be utilised from. Any episode from before the start date will utilise the **Old Fees**
5. The **End of Current Fee** date indicates the date that the **Current Fees** will expire. Users will still be able to create IFC's for admissions after the End of Current Fee date. However, the system will prohibit billing for episodes that fall after this date. *(This date isn't mandatory. However, it is a good way to ensure accounts aren't accidentally billed at outdated prices)*
6. The **Same Day Fees** tab contains the **Same Day Accommodation Fees** and the **Theatre Banding Charges**
7. Users are also given the ability to **Print** the health fund fees, for the selected fund

11. Enter the new fees in the **Full Fee** column for the corresponding bands. *(C is for Type C procedures)*
12. Once all Full Fees are entered, use the **More Actions** dropdown, and select **Click to Move Charge into Full Rebate**. This will copy all fees from the **Full Fee** column over into the **Full Fee Rebate** *(Do not do this step for un-insured fees or for other 'funds' that don't attract a rebate)*
13. Depending on the contract agreement, facilities may need to add the **Full Fee** amount into the **Basic Fee** column. This can easily be done by using the **More Actions** drop down.
14. Repeat the same steps 10 > 12 for the **Theatre Banding Charges** on the right side of the screen

[IFC for an Episode that is partially covered by the Health Fund](#)

There will be some instances where insured patients need to pay for part of their procedure.

Maybe some of the procedures is classified as a cosmetic procedure, maybe they have restrictions on their level of cover & the hospital is able to raise a charge to the patient for those extra procedures.

Maybe the hospital is contracted for 2nd Tier rates and can charge a patient gap or they want to charge a credit card surcharge to the patient.

Whatever the case may be, FYDO accommodates this split method of billing the health fund AND the patient seamlessly.

The first step in this process is to ensure the patient is entered with their Health Fund Details for the episode. And then adding the items to the **Edit Appointment** Screen.

As seen below, FYDO gives the option to **Send Invoice To** the Health Fund or the Patient. This allows the user to select certain items that will be billed to the patient.

Each facility is able to add their own "codes" to the Other Services list in FYDO. This can be done by

following the instructions for [Adding Other Services Codes \(Hospital\)](#) and then adding the corresponding fees by following the instructions for [Adding Fees for Other Service Codes \(Hospitals\)](#)

After all required information is entered, the user can click **Save**. They will then be prompted to review the information, as FYDO wants to be sure that the items are being bill correctly.

Therefore click **Ignore and Save**.

From here, the user is able to proceed to creating the **IFC**. This is where we will be able to see that the items being billed to the health fund **will** attract a rebate. And the items being billed to the patient **will not** attract a rebate.

Once the IFC is produced the patient will be able to clearly see which items attract a health fund rebate & which items do not.

For information in receipting payments for these types of episodes visit these instructions for
