

# FYDO Hospital Update - 11/09/2025

## Upcoming Layout Change

As part of the upcoming major update scheduled for **21 September 2025**, the Appointment Screen will feature a refreshed layout. A preview of the new design is shown below.

The screenshot shows the 'Appointments' screen for 'Theatre 3' on Wednesday, 10 Sep 2025. It displays a list of appointments with columns for Time, Name, MRN, Procedure, Surgeon, Notes, and various status flags (Sts, C, B, HF, OOP). The appointments are color-coded by time slots: 09:00-10:00 (pink), 10:00-11:00 (blue), 11:00-12:00 (pink), 12:00-13:00 (pink), 13:00-14:00 (pink), and 14:00-15:00 (pink).

## Theatre Screen Addition

FYDO has introduced a new feature within the Theatre Screen that allows users to quickly view procedure notes. As shown in the image below, a yellow **"Show Proc Notes"** icon has been added. By hovering over this icon, you can see a preview of the notes entered for the procedure.

The screenshot shows the 'Theatre Screen' for patient MRN 132 - MOUSE, Mickey. It displays patient information (DOB 27/12/1977, Sex Male) and admission details (Admission No. 1029, EpiNo. 22, Admission Date/Time 08/09/2025 10:30, Discharge Date/Time 08/09/2025 10:30). The 'Theatre Visits' section shows a visit to Theatre 3 for 'Colonoscopy & Gastroscopy + Polyp' on 08/09/2025 at 10:35. A 'Show Proc Notes' button is highlighted, showing a preview of the procedure notes. The 'Pre-Op' section includes fields for 'First', 'Date', 'Planned Time in Theatre', 'Pre-Op', 'Anaesthetic Start', 'Time In Theatre', 'Surgical Time Out', and 'Positioned Time'.

Field	Value
MRN	132 - MOUSE, Mickey
DOB	27/12/1977 (47)
Sex	Male
Admission No.	1029
EpiNo.	22
Admission Date/Time	08/09/2025 10:30
Discharge Date/Time	08/09/2025 10:30

First	First
Date	08/09/2025
Planned Time in Theatre	5 mins
Pre-Op

Positioned Time	

This enhancement is particularly valuable in facilities where nurses and doctors primarily rely on the Theatre Screen, as it eliminates the need to refer back to the printed list, providing faster and more efficient access to critical information.

## New Token

FYDO now includes a token for **Gender**. Please see below for details on the newly added token.

Gender ID = <<patGender2>>

Gender Description = <<patGender2Desc>>

Admission Time	Patient Name	Doctor/Anaesthetist
07:00 Diabetic, Anxiety	DEAN, James (M) DOB: 01/01/1942 (83) Gender ID: 1 Gender: Man, or boy, or male	Doctor: EYES, Bright Anaes: CELES, Monica Anae Type: None
07:30 Infection	DAY, Doris (F) DOB: 03/04/1922 (103) Gender ID: 2 Gender: Woman, or girl, or female	Doctor: EYES, Bright Anaes: CELES, Monica Anae Type: IV/Sedation

### Episode Stats Report Addition

FYDO has enhanced the Episode Stats Report to incorporate Body Stats, one of our latest features. The Excel Raw Data Report now includes four additional columns: Height, Weight, BMI and Stats Date.

RN	RO	RP	RQ
Height	Weight	BMI	StatDate

### Print List Enhancement

FYDO has introduced a new tick-box option when printing lists, allowing you to generate lists exclusively for patients with **Food Instructions entered** to identify special dietary requirements. This enhancement provides a more efficient way to identify and manage patients' specific needs.

### Billing Status Addition

FYDO has introduced a new ordering option within the Billing Status Report. When the **Report Type** is set to **Show Not Billed Only**, a new **Order By** field will become available. This feature functions identically to the **Order By** option in the Incomplete Report and will default to **Alphabetical** ordering.

## New Option in Casebase Settings

FYDO has introduced a new column titled **Ignore Step Down** in the **Settings > Health Fund Fees > Casebase Fees** tab. This column is a tick box, similar in function to the existing **GST** column.

This enhancement addresses scenarios where certain facilities require the **Procedure Only** fee to be calculated at 100%, even when the item is listed as a secondary or subsequent procedure. However, as this rule does not apply universally to all item numbers within the Casebase list, some of which still require percentage-based step downs. The new tick box provides the flexibility to manage these exceptions on an item-by-item basis.

If you need to upload the Casebase import file, the new field will be located in column J. Additionally, both the PDF and Excel spreadsheet outputs have been updated to include the 'Ignore Step Down' column.

### Exporting Fund Fees

We've made an enhancement to the **Settings > Health Fund Fees** section. The previous "Print" option, located in the top right-hand corner, has been updated and renamed to "**Export To**". This new functionality now allows you to export Health Fund Fees not only as a **PDF**, but also as an **Excel spreadsheet**, providing greater flexibility and convenience.

## Bed Tracker Addition

We've introduced an additional option to the **Bed Tracker** screen for the overnight hospitals. When selecting the "**Print Handover**" button in the top right-hand corner, you will now have the ability to print the handover **by doctor**.

This enhancement ensures that doctors only view information relevant to their own patients, improving efficiency and maintaining patient confidentiality.

### Improved workflow for creating an IFC

Wanting to generate an IFC for a patient that is NOT booked for an appointment yet? You can now do this directly from the patient screen, eliminating the need to navigate back to the Patient List Screen. This new feature is accessible by clicking on the three dots on the right-hand side of the patient screen which will generate a drop-down menu where you will see this option.

Users will need to add additional information while using this feature, as it isn't linked to a particular appointment with pre-populated item numbers etc.

### Body Stats

FYDO has introduced a new **Body Stats** tab, now available within the **Clinical** section of the **Patient Screen**. This feature allows users to record a patient's height and weight, with the system automatically calculating the Body Mass Index (BMI). Users can also assign a start date to these measurements.
