# FYDO Clinic Update – 25/09/2025

New Waitlist Feature

When adding a patient to the waitlist, you'll now see a new tick box option: **"Transfer notes into appointment."**

If this box is ticked, any notes you enter at the time of adding the patient to the waitlist will automatically carry across to the patients appointment when made from the waitlist.

FYDO Hospital Update – 25/09/2025

Addition to Certificates

A new improvement has been made regarding the addition of certificate reasons in patient records. In the **Settings** tab, you will now find an option for **Certificates**, where you can define and add your certificate reasons.
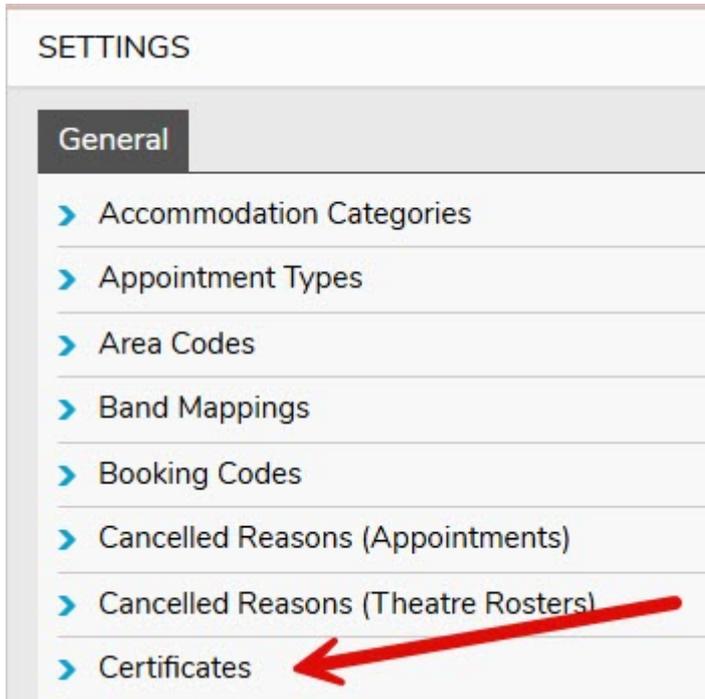

Once the reasons are added, you will have the option to select from a drop-down menu when adding a certificate to the patient's file. While this new feature provides a pre-defined selection, please note that you will still have the flexibility to free-type any additional text as needed.
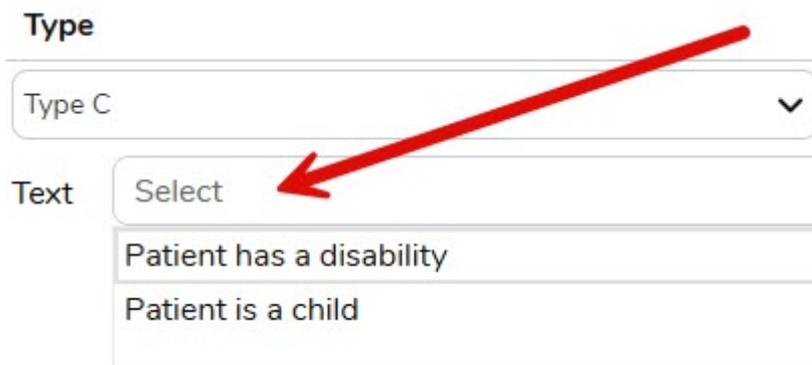

Update to Patient Alerts

FYDO has now aligned the functionality of Patient Alerts with that of Patient Allergies. When "NIL" is entered in the Patient Alerts section, it will no longer be displayed on the appointment screen, as it is deemed not applicable.
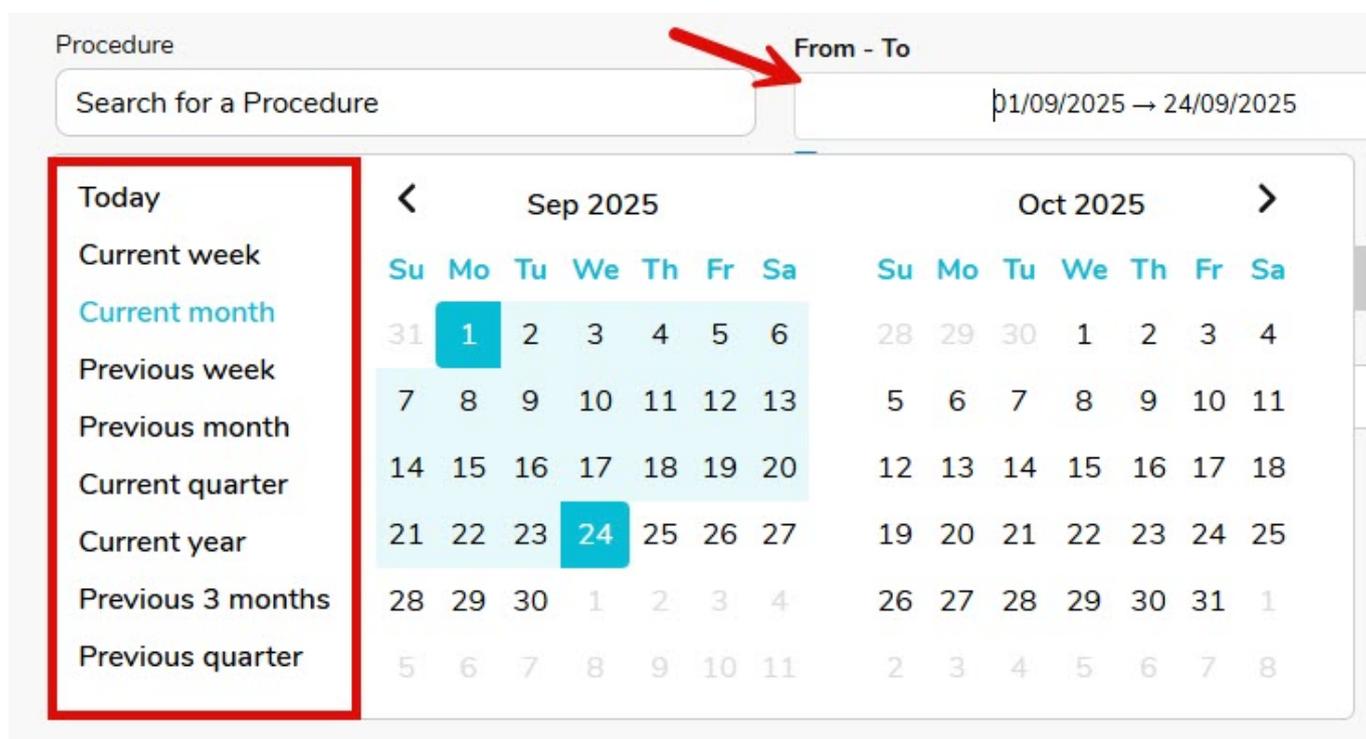

Episode Stats Date Range Addition

A new feature has been added to the **Episode Stats** section under **Reports**. When you click on the date, FYDO now provides the option to search data from specific time periods via a button. The available time periods include:

- Current Week
- Current Month
- Previous Week
- Previous Month
- Current Quarter
- Current Year
- Previous 3 Months
- Previous Quarter

This enhancement is designed to streamline your reporting process and make it easier to retrieve data for the desired time frames.

Change in Episode Stats Re-Admission

Episode stats can now show re-admission within a stipulated number of days.

Enhancement to Medical Retention Record

In the **Medical Retention Record** section under **Reports**, a new column has been added to the export functionality. When exporting this document to Excel, you will now see a dedicated column displaying the procedure notes.

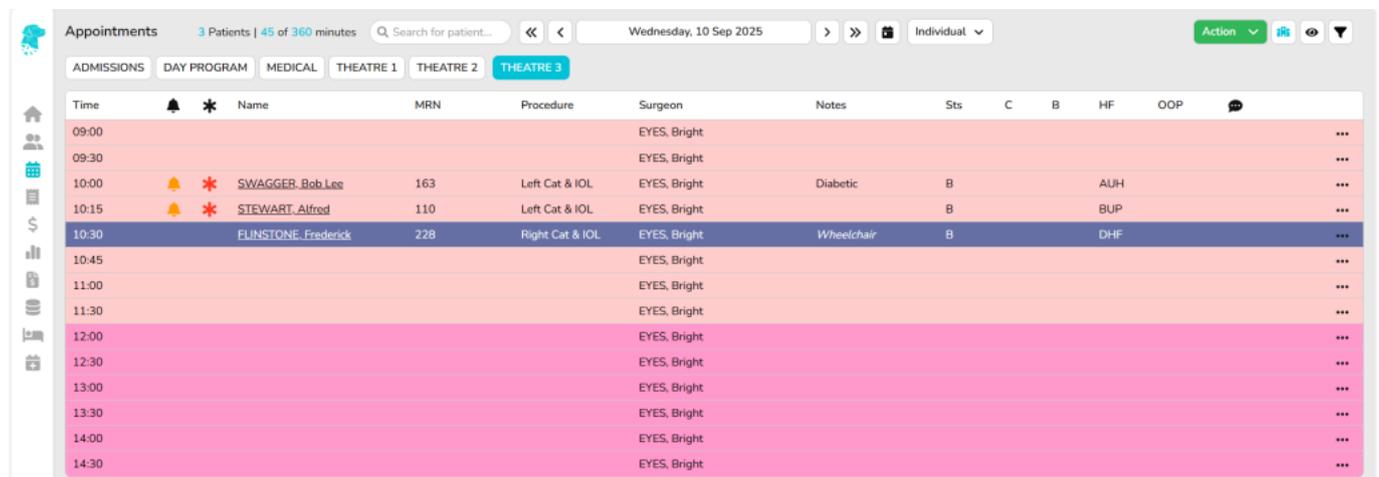

# FYDO Hospital Update – 11/09/2025

Upcoming Layout Change

As part of the upcoming major update scheduled for **21 September 2025**, the Appointment Screen will feature a refreshed layout. A preview of the new design is shown below.

For more details on this layout and the location of specific features, please refer to the link provided:

Theatre Screen Addition

FYDO has introduced a new feature within the Theatre Screen that allows users to quickly view procedure notes. As shown in the image below, a yellow **"Show Proc Notes"** icon has been added. By hovering over this icon, you can see a preview of the notes entered for the procedure.
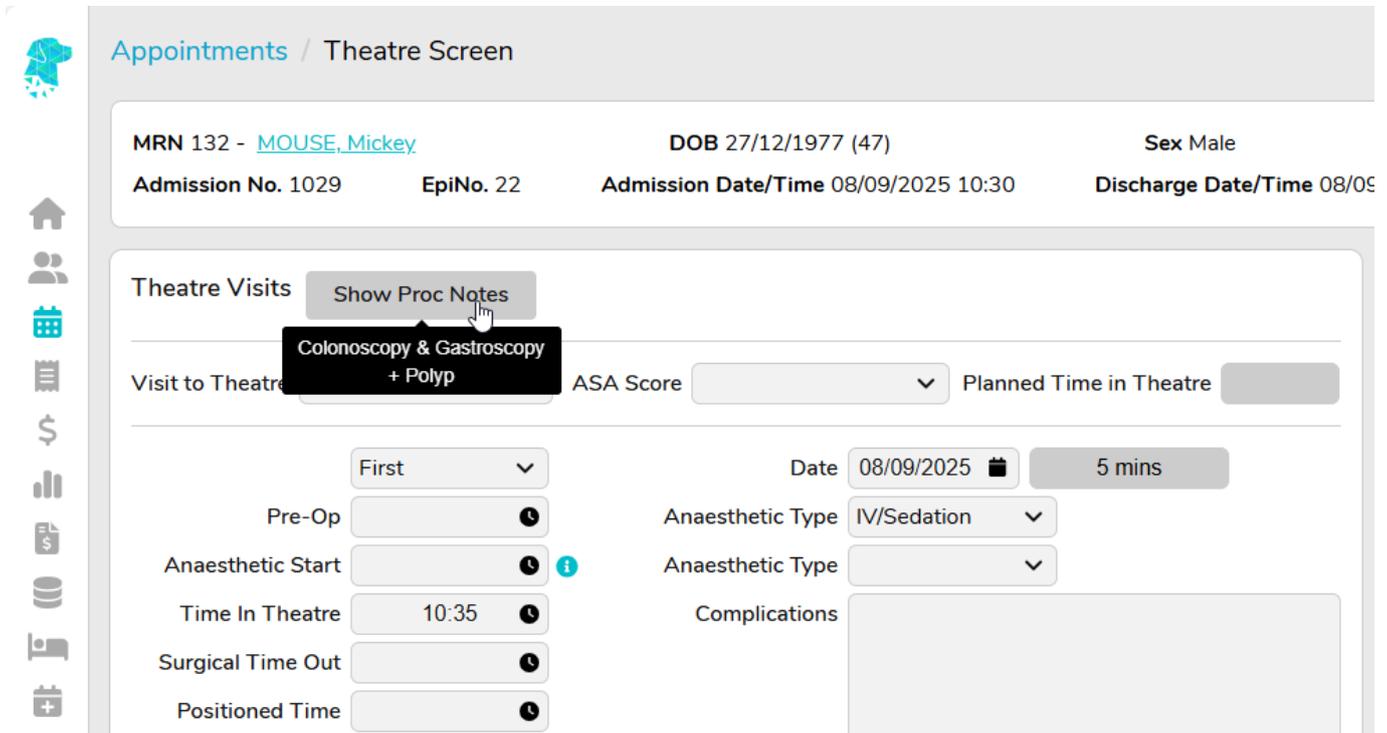

This enhancement is particularly valuable in facilities where nurses and doctors primarily rely on the Theatre Screen, as it eliminates the need to refer back to the printed list, providing faster and more efficient access to critical information.

New Token

FYDO now includes a token for **Gender**. Please see below for details on the newly added token.

Gender ID = <<patGender2>>
Gender Description = <<patGender2Desc>>

For a complete list of available Patient tokens, please refer to the FYDO Wiki Manual via the link below:

FYDO Hospital Update – 03/09/2025

Episode Stats Report Addition

FYDO has enhanced the Episode Stats Report to incorporate Body Stats, one of our latest features. The Excel Raw Data Report now includes four additional columns: Height, Weight, BMI and Stats Date.

RN	RO	RP	RQ
Height	Weight	BMI	StatDate

Print List Enhancement

FYDO has introduced a new tick-box option when printing lists, allowing you to generate lists exclusively for patients with **Food Instructions entered** to identify special dietary requirements. This enhancement provides a more efficient way to identify and manage patients' specific needs.

FYDO Hospital Update – 28/08/2025

Billing Status Addition

FYDO has introduced a new ordering option within the Billing Status Report. When the **Report Type** is set to **Show Not Billed Only**, a new **Order By** field will become available. This feature functions identically to the **Order By** option in the Incomplete Report and will default to **Alphabetical** ordering.

New Option in Casebase Settings

FYDO has introduced a new column titled **Ignore Step Down** in the **Settings > Health Fund Fees > Casebase Fees** tab. This column is a tick box, similar in function to the existing **GST** column.

This enhancement addresses scenarios where certain facilities require the **Procedure Only** fee to be calculated at 100%, even when the item is listed as a secondary or subsequent procedure. However, as this rule does not apply universally to all item numbers within the Casebase list, some of which still require percentage-based step downs. The new tick box provides the flexibility to manage these exceptions on an item-by-item basis.

If you need to upload the Casebase import file, the new field will be located in column J. Additionally, both the PDF and Excel spreadsheet outputs have been updated to include the 'Ignore Step Down' column.

FYDO Hospital Update – 21/08/2025

Exporting Fund Fees

We've made an enhancement to the **Settings > Health Fund Fees** section. The previous "Print" option, located in the top right-hand corner, has been updated and renamed to **"Export To"**. This new functionality now allows you to export Health Fund Fees not only as a **PDF,** but also as an **Excel spreadsheet**, providing greater flexibility and convenience.
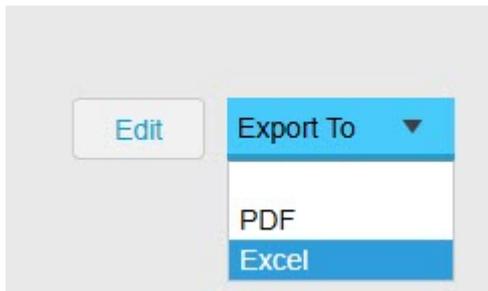

Bed Tracker Addition

We've introduced an additional option to the **Bed Tracker** screen for the overnight hospitals. When selecting the **"Print Handover"** button in the top right-hand corner, you will now have the ability to print the handover **by doctor**.

This enhancement ensures that doctors only view information relevant to their own patients, improving efficiency and maintaining patient confidentiality.

FYDO Clinic Update – 14/08/2025

Merge Practices Feature

Facilities now have the ability to merge **Practices**. This enhancement streamlines workflow and improves data management by providing a simple way to consolidate multiple practices and maintain a cleaner, more organised database. You will find this merge feature in **Settings > Practices > Select Practice**.

Permissions for this feature can also be managed within **User Groups** under **Settings General**. Users with **Read and Write (RW)** access will have the ability to merge practices.

FYDO Hospital Update – 14/08/2025

Merge Practices Feature

Facilities now have the ability to merge **practices**. This enhancement streamlines workflow and improves data management by providing a simple way to consolidate multiple practices and maintain a cleaner, more organized database. You will find this merge feature in **Settings > Practices > Select Practice**.

Permissions for this feature can also be managed within **User Groups** under **Settings General**. Users with **Read and Write (RW)** access will have the ability to merge practices.

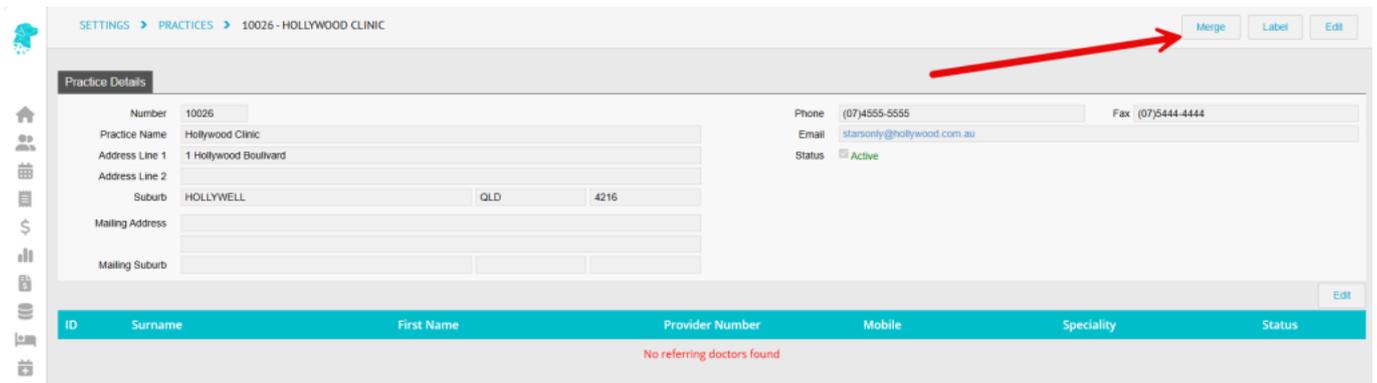

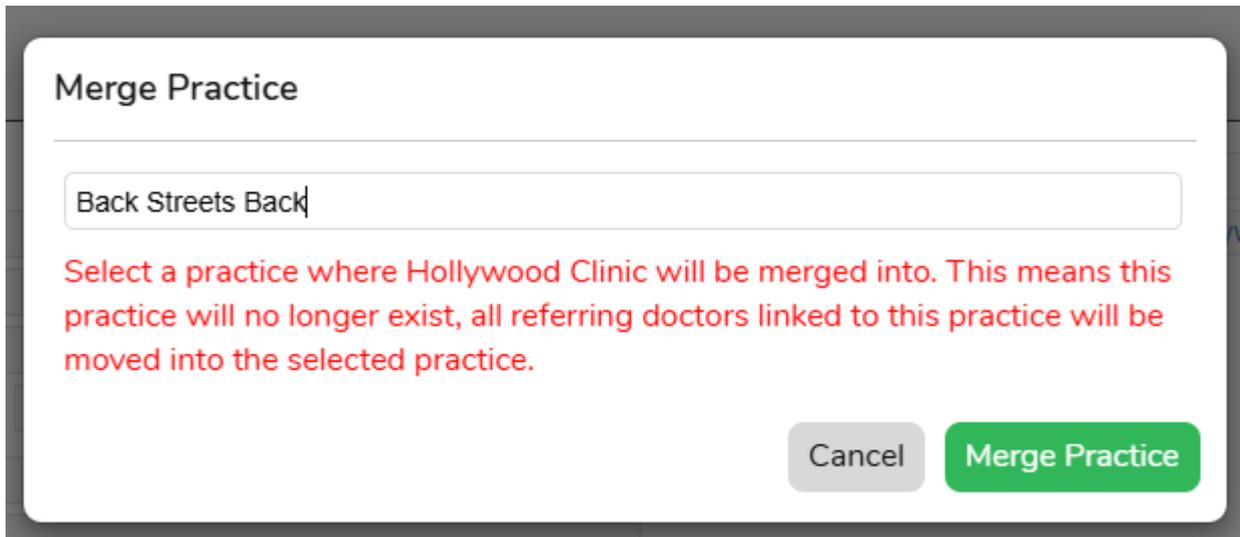

Incomplete Report Addition

FYDO has implemented an enhancement to the Incomplete Report: when the report is run using the *Uncoded Episodes* or *Ungrouped Episode* filters, the **Coding on Hold** reason will now be displayed.

New Column on Revenue Report

A new column has been added to the *Revenue Report – Raw Data* Excel file. Located in column **BB**, the new field is titled **InvGross ex OS 6**. This column represents the total revenue excluding the value of prostheses.

FYDO Clinic Update – 07/08/2025

Improved workflow for creating an IFC

Wanting to generate an IFC for a patient that is NOT booked for an appointment yet? You can now
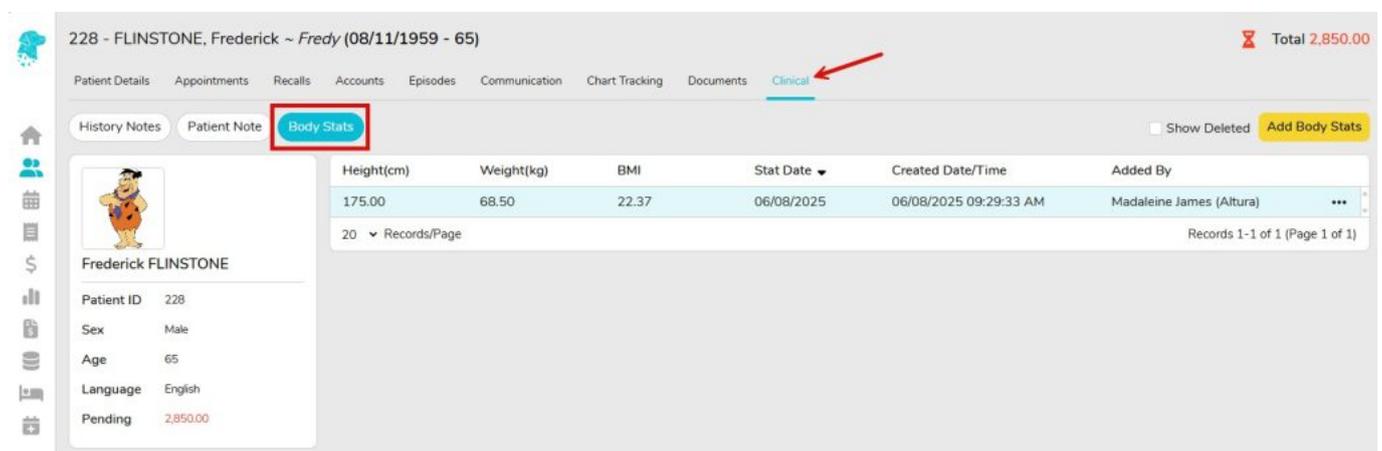

do this directly from the patient screen, eliminating the need to navigate back to the Patient List Screen. This new feature is accessible by clicking on the three dots on the right-hand side of the patient screen which will generate a drop-down menu where you will see this option.

Users will need to add additional information while using this feature, as it isn't linked to a particular appointment with pre-populated item numbers etc.

Body Stats

FYDO has introduced a new **Body Stats** tab, now available within the **Clinical** section of the **Patient Screen**. This feature allows users to record a patient's height and weight, with the system automatically calculating the Body Mass Index (BMI). Users can also assign a start date to these measurements.

If height and weight data are entered during the **Preadmit Admission Form** process, they will automatically transfer to FYDO and be stored within the Body Stats section.

Additionally, user permissions for this feature can be managed within **User Groups**, with access levels configurable to **Deny**, **Read**, or **Read and Write**.
