In Bed Tracker, we have introduced a new shortcut option that allows users to navigate directly to the Theatre screen by right-clicking on a patient. This enhancement is intended to streamline workflow and improve ease of access.

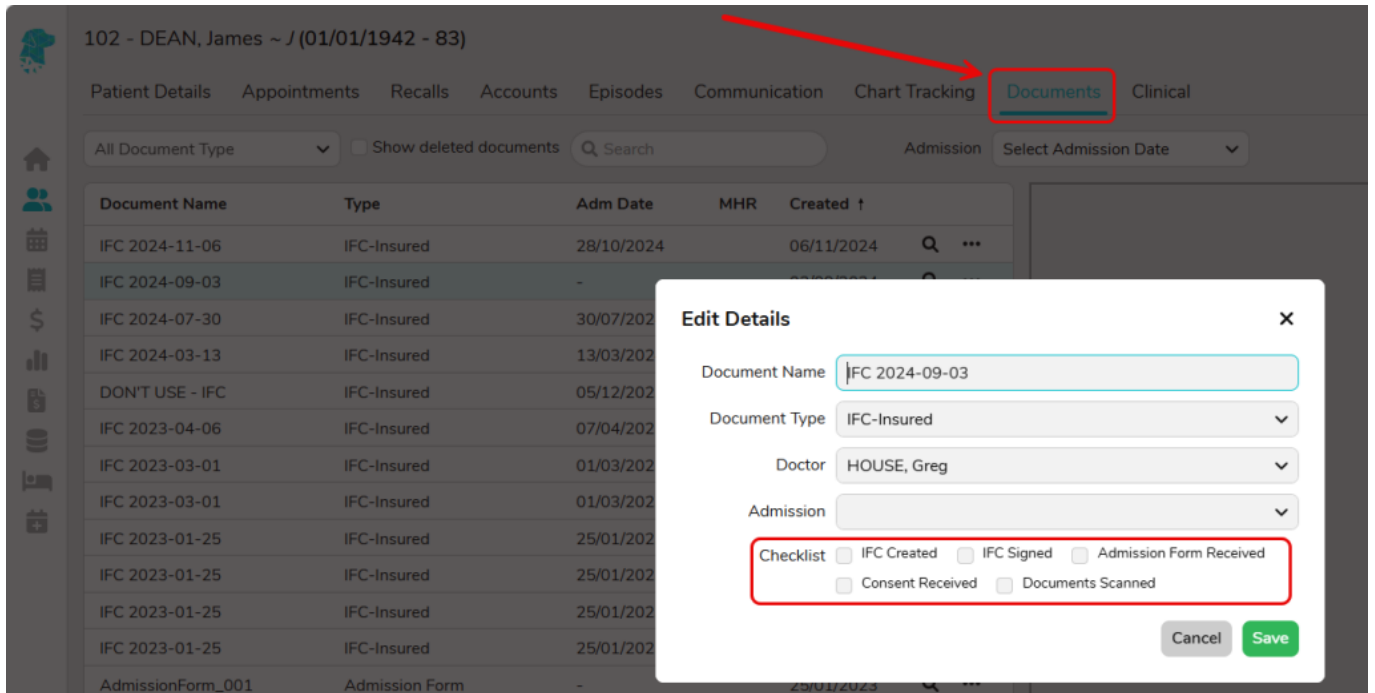

When admitting a patient, updating the **'Transferred From'** field will automatically populate the relevant hospital information for a contracted patient. However, contract types can vary between hospitals and between different contracts.

To accommodate this, we have added a new **Contract Type** section under **Settings > Hospitals**. When setting up a new local contracting hospital, you can now manually select the appropriate contract type, ensuring the system populates accurate for every admission and populates the correct data.

Documents Enhancement

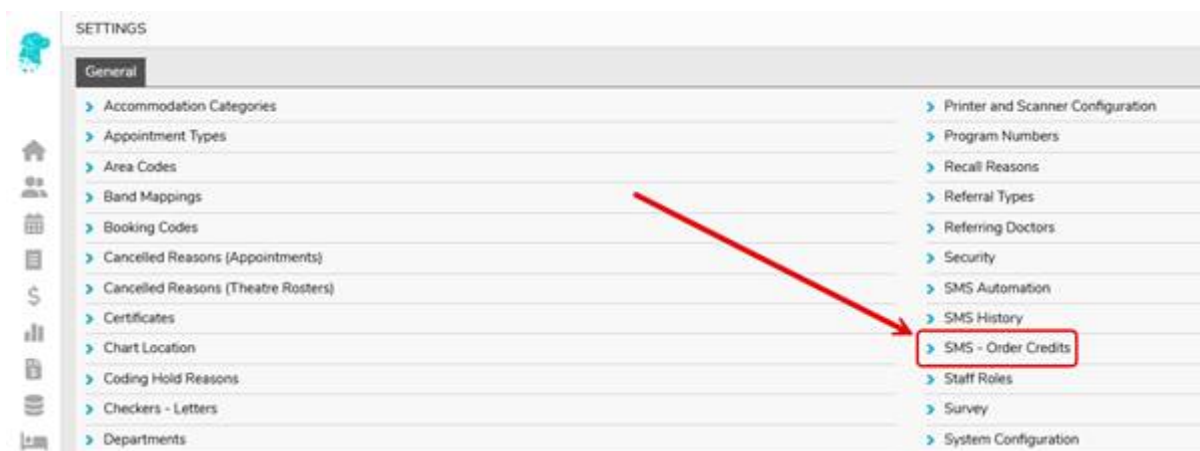

Users are now able to tick **Checklist** items as they import or edit **Documents** that have been loaded. This feature allows users to easily tick certain boxes, e.g. **IFC Signed** as they are uploading the signed IFC, instead of then having to go back to the appointments screen to check the item.

Report Enhancement

FYDO has introduced an enhancement across multiple reports, adding a **date range dropdown** that allows users to select a specific reporting period. This functionality mirrors the feature recently implemented in the **Episode Report**.

The enhanced date selection is now available for the following reports:

- Revenue Report
- Other Services Revenue
- Unbilled Revenue Report
- Trial Balance
- Payments

Medical Record Retention Improvement

FYDO has introduced a new feature that enables facilities to easily identify which files are eligible for culling within a specific month. Users can now **filter the Medical Retention Report** based on **Admission Date**, or **Discharged Date**, based on their requirements. Allowing them to streamlining record management and retention processes.

Unbilled Revenue Report Enhancement

FYDO has enhanced the **Unbilled Revenue Report**. The MBS Item Numbers, from the first theatre visit, are now included in the Excel Raw Data export for greater transparency and ease of analysis. This new information will appear starting in column AD when run in summary and in column AE when run in detailed.

Summary:

Theatre Roster Improvements

FYDO has made a significant enhancement to the Theatre Roster feature. Previously, users could create recurring theatre lists but were advised to limit them to three months, as bulk editing and deleting were not available. We're pleased to announce that these capabilities have now been added. **Users can now bulk edit and bulk delete theatre lists**, saving valuable time and reducing the need for individual adjustments.

As long as the **Repeat** function is used when making the initial booking, the doctors' sessions will be linked and can then be amended together. To utilise this function:

1. Click on the 3 dots
2. Select which action - Edit or Delete
3. Pick from the x3 options

Theatre Roster Report Addition

Two new columns have been added to the *Theatre Roster* report relating to *Revenue*:

- **Rev incl OS** - Revenue Including Other Services Revenue
- **OS Rev** - Other Services Only Revenue

These additions were made in response to growing interest from facilities in understanding their revenue breakdowns. This enhancement allows for better analysis of how profitable each doctor is during their Theatre Sessions/Rosters.

450.00	0.00
450.00	0.00
450.00	0.00

Processing and Payments Enhancements

A new enhancement has been added to the *Processing and Payments* tab under *Payments (Hospital)*. The **Invoice #** now functions as a hyperlink, providing quick access to the patient's episode as required.

The screenshot shows the 'Processing And Payment Reports' interface. The 'Payments (Hospital)' tab is active. The table below shows payment transactions with columns for Date Downloaded, Minor ID, Type, Payor, Date Paid, Amount Paid, Remittance #, ID, Applied, and Action. A red arrow labeled '1' points to the 'Date Downloaded' column. Below the main table, there is a section for 'Transaction Id', 'Batch #', 'Inv#', 'Date Sent', 'MRN', 'Patient Name', and 'Amount Paid'. A red arrow labeled '2' points to the 'Inv#' column in this section.

Date Downloaded	Minor ID	Type	Payor	Date Paid	Amount Paid	Remittance #	ID	Applied	Action

		1067	29/09/2025			

Additionally, the **Processing IHC** screen has been rearranged to allow for a wider and more readable **Explanation** column. Additionally, you can now hover over the explanation to view the full text.

Trial Balance Improvement

The *Trial Balance* report has been enhanced to include GST in the *Billings*, *Payments*, and *Adjustments* columns. This update allows users to view the total balance including GST, or to isolate and review GST amounts independently.

New Waitlist Feature

When adding a patient to the waitlist, you'll now see a new tick box option: **"Transfer notes into appointment."**

If this box is ticked, any notes you enter at the time of adding the patient to the waitlist will automatically carry across to the patients appointment when made from the waitlist.
