FYDO Clinic Update – 07/08/2025

Improved workflow for creating an IFC

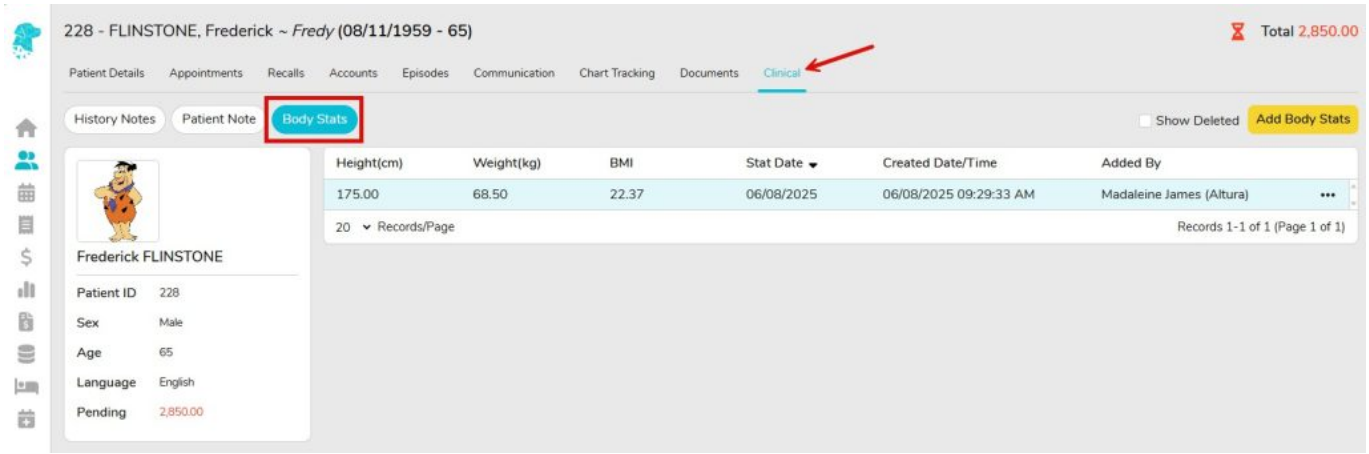

Wanting to generate an IFC for a patient that is NOT booked for an appointment yet? You can now do this directly from the patient screen, eliminating the need to navigate back to the Patient List Screen. This new feature is accessible by clicking on the three dots on the right-hand side of the patient screen which will generate a drop-down menu where you will see this option.

Users will need to add additional information while using this feature, as it isn't linked to a particular appointment with pre-populated item numbers etc.

Body Stats

FYDO has introduced a new **Body Stats** tab, now available within the **Clinical** section of the **Patient Screen**. This feature allows users to record a patient's height and weight, with the system automatically calculating the Body Mass Index (BMI). Users can also assign a start date to these measurements.

If height and weight data are entered during the **Preadmit Admission Form** process, they will automatically transfer to FYDO and be stored within the Body Stats section.

Additionally, user permissions for this feature can be managed within **User Groups**, with access levels configurable to **Deny**, **Read**, or **Read and Write**.

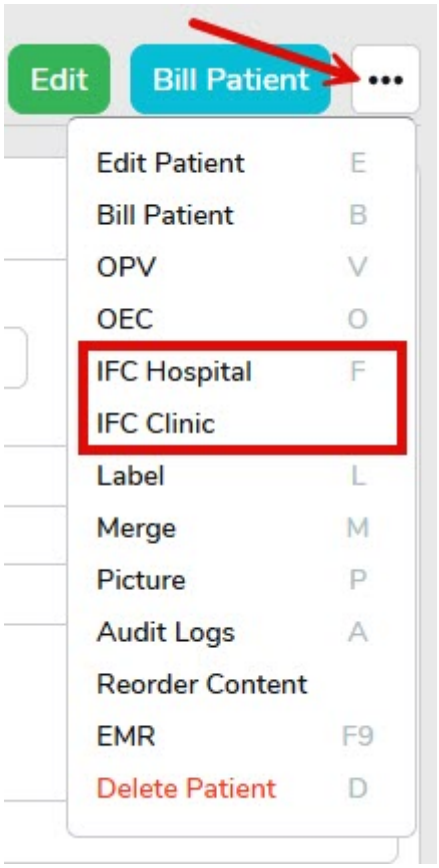

For previous updates, please visit https://wiki.fydo.cloud/updates-clinic/

Body Stats

FYDO has introduced a new **Body Stats** tab, now available within the **Clinical** section of the **Patient Screen**. This feature allows users to record a patient's height and weight, with the system automatically calculating the Body Mass Index (BMI). Users can also assign a start date to these measurements, accommodating variations across different admissions.

If height and weight data are entered during the **Preadmit Admission Form** process, they will automatically transfer to FYDO and be stored within the Body Stats section.

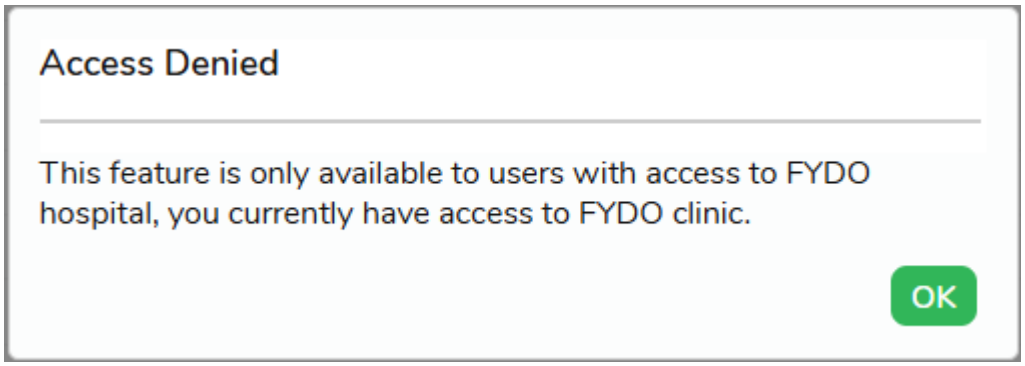

Additionally, user permissions for this feature can be managed within **User Groups**, with access levels configurable to **Deny**, **Read**, or **Read and Write**.

FYDO Clinic Update – 31/07/2025

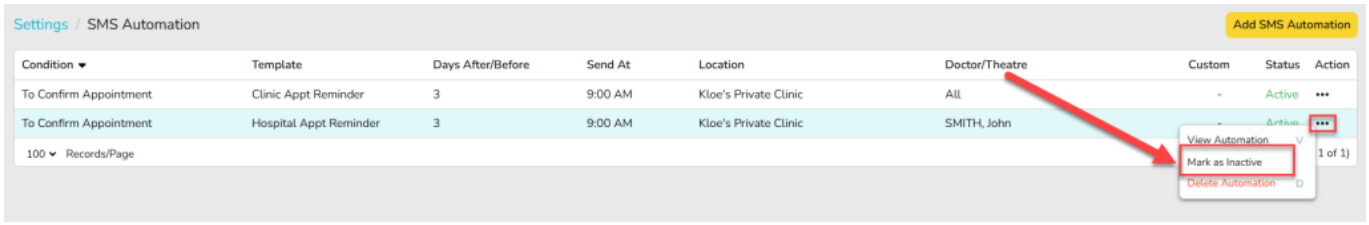

New Alerts

Clinic users will now see clear alerts when attempting to access FYDO features that are only available in the FYDO Hospital module.

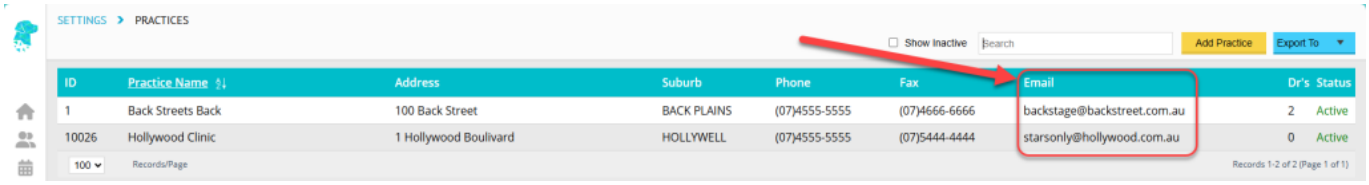

SMS Automation

Clinics can now **Deactivate** SMS Automations, allowing them to pause messages when needed without deleting the entry or losing the settings.

Practices

Email addresses are now displayed in the list of **Practices** under **Settings.** This information is also included in the **Excel Export,** making it easy for clinics to access and use for emailing purposes.

FYDO Hospital Update – 31/07/2025

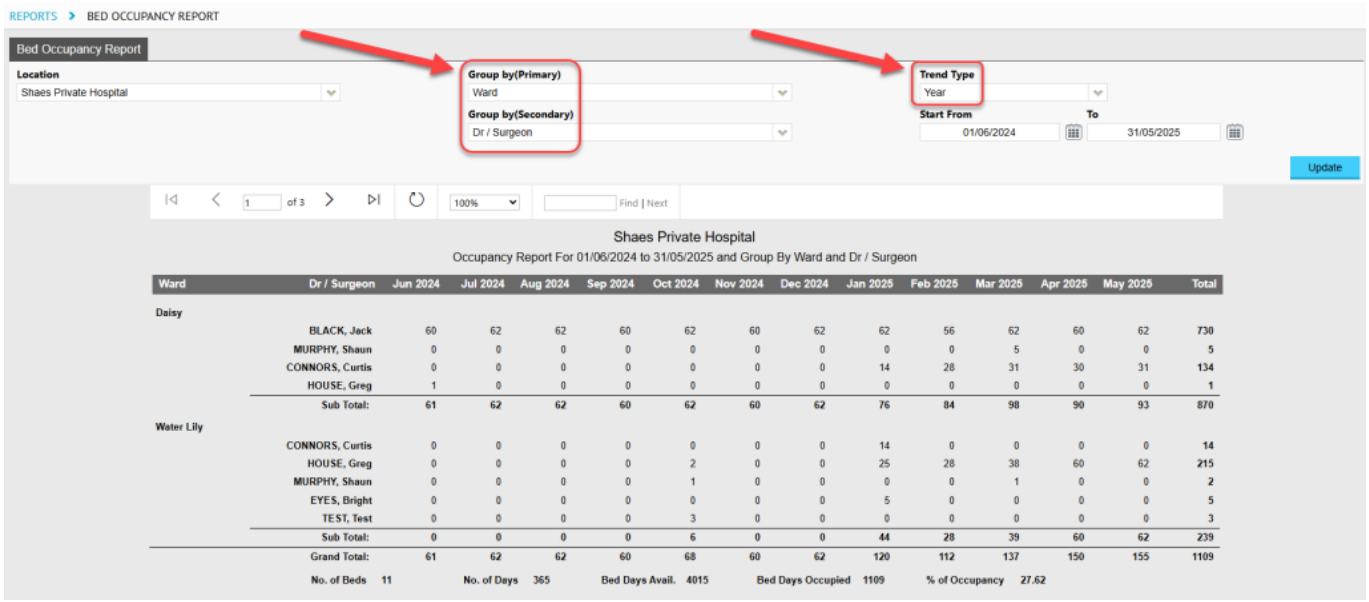

New Alerts

Hospital users will now see clear alerts when attempting to access FYDO features that are only available in FYDO Clinic databases.

Bed Occupancy Report

Additional features have been added to the **Bed Occupancy Report,** allowing facilities to collate data in ways that better suit their workflow and needs.
Users can now select a **Primary AND Secondary Group By** option, as well as the desired **Trend Type** *(Week, Month or Year)*, to ensure the data is presented in a clear, easy-to-read format.

FYDO Hospital Update – 24/07/2025

Length of Stay Report

The Length of Stay Report now has an extended list of **Group By** options, when running this report using **Report Type > Summary.**

Users can now group data by several categories, allowing for easier and more efficient extraction of relevant information.

To further enhance this report, **Average Minutes** has been added to each category line, reducing the need for manual calculations.

Shaes Private Hospital

Length Of Stay Report based on Intra-Operative: 'Time in Theatre' to 'Time out of Theatre' between 01/01/2025 to 23/07/2025 and Order By Primary Group

For Doctor = Multiple Doctors and Group By (Primary) Doctor

Primary Group	Avg(mins)	Length (mins)	# of Episode
CONNORS, Curtis	45.14	948	21

FYDO Hospital Update – 17/07/2025

Episode Stats Report

We have made several updates to the Excel Raw Data Report in Episode Stats to reflect the enhanced functionality of supporting multiple pension numbers in the patient screen. The following new columns have been added:

- **NR** – Concession Card
- **NS** – Concession Expiry
- **NT** – Pension Card
- **NU** – Pension Expiry
- **NV** – Safety Net Card
- **NW** – Safety Net Expiry
- **NX** – Ambulance Card
- **NY** – Ambulance Expiry

NR	NS	NT	NU	NV	NW	NX	NY
ConcessionCard	ConcessionExp	PensionCard	PensionExp	SafetyNetCard	SafetyNetExp	AmbulanceCard	AmbulanceExp

Additionally, three new columns have also been included to this report to capture **Gender** and **Pronoun** information:

- **G** – Gender Value
- **H** – Gender Description
- **I** – Pronoun

	A	B	C	D	E	F	G	H	I	J	K
1	Location	MRN	EpisodeN	AdmNum	PatientName	Sex	Gender	GenderDesc	Pronoun	DOB	Address1
2	1	228	23	974	FLINSTONE, Frederick	M	1	Man, or boy, or male	He/Him/His	08/11/1959	222 Rocky Way
3	1	163	19	976	SWAGGER, Bob Lee	M	1	Man, or boy, or male		16/04/1986	123 Longshot Lane
4											
5											
6											

These updates ensure that the report now accommodates the expanded data fields for greater accuracy and inclusivity.

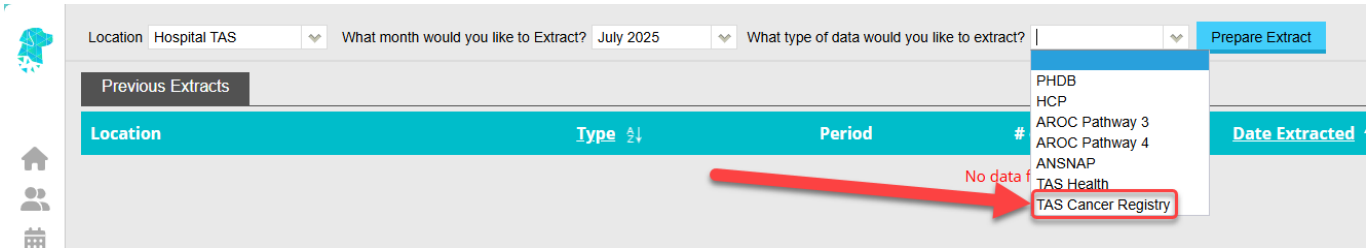

FYDO Hospital Update – 10/07/2025

Tasmanian Cancer Registry

During our FYDO Hospital Update on 01/05/2025 (FYDO Hospital Update – 01/05/2025), we introduced the **Tasmanian Health Cancer Registry screen**, designed to support cancer registry data entry for Tasmanian facilities.

We're pleased to let you know that FYDO now supports exporting this data file, using the same process as the other end-of-month data extracts.

This update means that reporting to the TAS Cancer Registry is now a seamless and efficient process for our Tasmanian hospitals.

FYDO Hospital Update – 03/07/2025

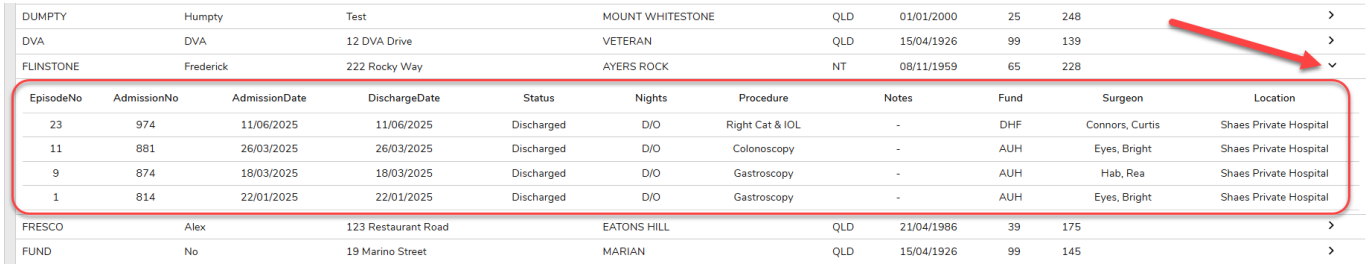

New WA Health Requirement

In accordance with updated requirements from **WA Health**, a new mandatory field has been introduced to ensure the **Employment Status** is completed on admission.

If your facility is in Western Australian and has selected **On Admission, Make Patient Fields Mandatory** in the **System Configuration**, a pop-up notification will appear if any of the mandatory fields are left blank on admission, ensuring compliance with the new reporting standards.

Patient List Enhancement

We're pleased to introduce a new enhancement to the **Patient List**. A collapsible arrow is now available on the right-hand side of each patient entry. When selected, this will display the patient's **five most recent admissions**, providing quick access to their recent admission history without navigating away from the list.

New Coding Feature

We are pleased to announce the implementation of a new feature in FYDO to enhance your coding workflow which is the ability to add and select **Coding Hold Reasons**.

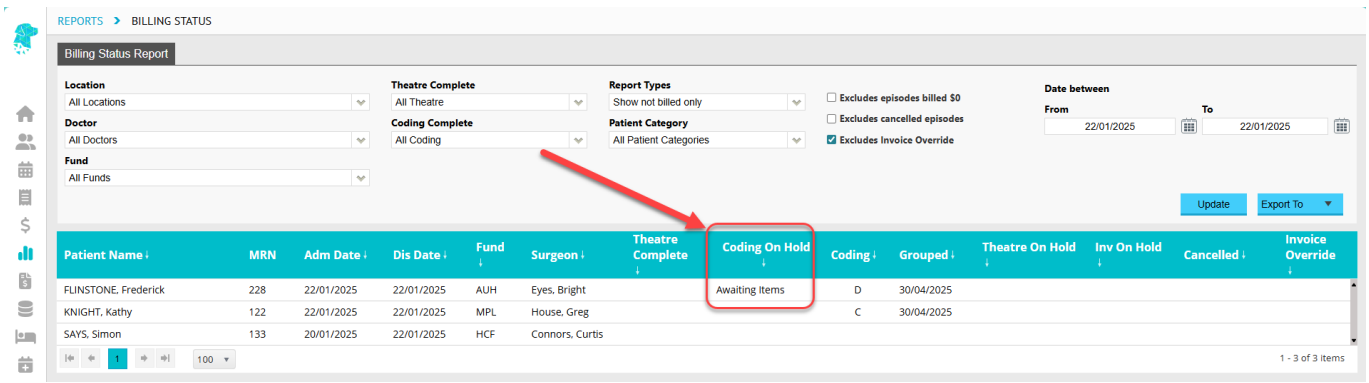

To set this up, navigate to **Settings > Coding Hold Reasons**. From there, click the yellow **"Add Coding Hold Reason"** button to create and manage your list of hold reasons.

Once configured, these options will be available for selection directly within the coding screen, allowing for clearer documentation and improved workflow tracking.

The **Coding Hold Reason** will also be displayed when viewing the **Billing Status > Show Not Billed Only** report.

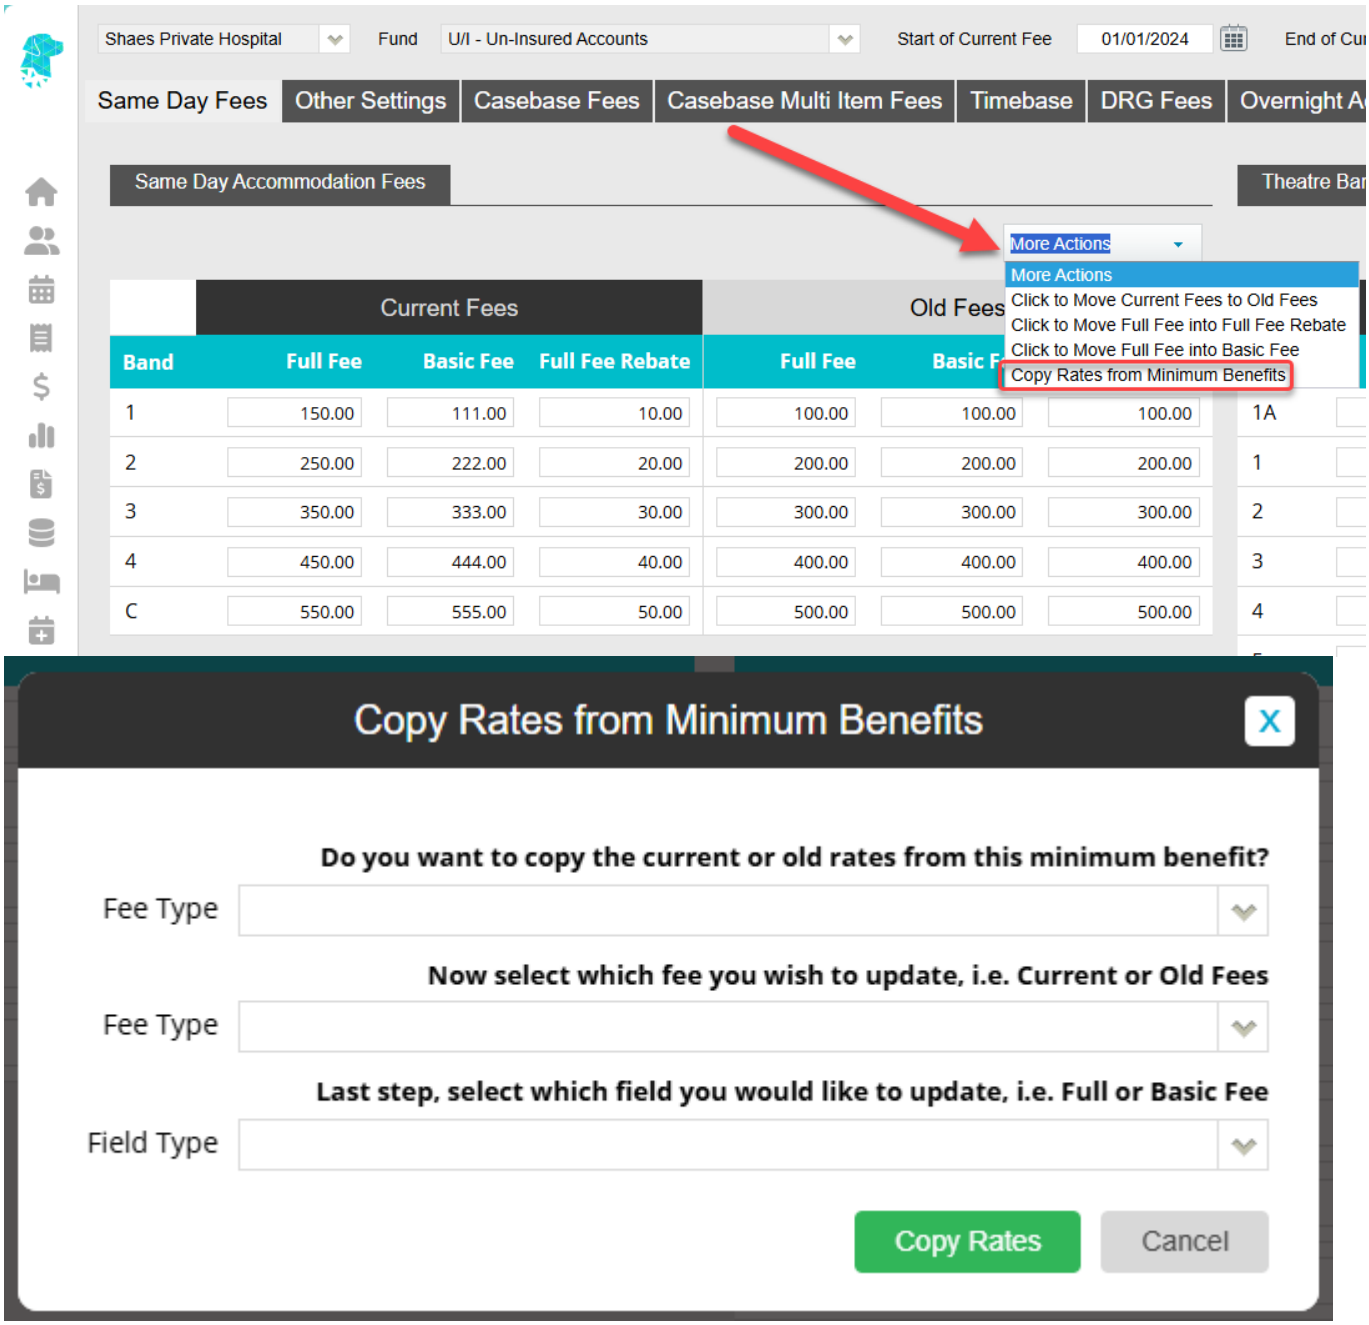

The coding screen has also been optimized to improve speed and functionality.

Health Fund Fee Setup Enhancement

FYDO has enhanced the **Health Fund Fee Setup** for the **Same Day Accommodation** setup.

The **More Options** dropdown will now reveal a new feature to **Copy Rates from Minimum Benefits**. When this option is selected, a pop-up window will appear, guiding you through a series of prompts to ensure the accurate transfer of relevant details. This improvement is designed to streamline the setup process and enhance data accuracy.

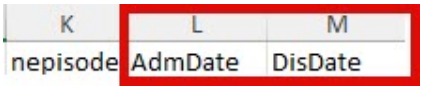

Upgrade to Invoice Export Report

An upgrade has made to the **Invoice Export** report located under **Reports > Invoice Export**. Upon exporting the report to Excel, you will now notice the addition of two new columns:

- **Column L:** Admission Date
- **Column M:** Discharge Date

These additions provide greater visibility into patient timelines and support more comprehensive reporting.

FYDO Hospital Update – 30/06/2025

ICD-10-AM 13th Edition Now Implemented in FYDO

From **1st July**, facilities are to adopt the 13th Edition of ICD-10-AM/ACHI/ACS. FYDO has been updated to support this transition in accordance with national standards. This means:

- For episodes **prior to 1 July**, the **12th Edition** will continue to be used.
- For episodes **on or after 1 July**, the **13th Edition** will automatically be applied.

This has now been successfully implemented across our platform which ensures accurate coding and reporting aligned with the Australian Coding Standards. FYDO will manage this transition for you by detecting episode dates and applying the appropriate coding standards without requiring manual input. However, we recommend that coding and health information management teams ensure they are familiar with the changes introduced in the 13th Edition.

If you have any questions about how the ICD update is applied in FYDO, or if you encounter any issues, please don't hesitate to contact our support team. We're here to ensure a smooth transition and continued ease of use.

National Procedure Banding List

The updated **National Procedure Banding List**, effective 1 July 2025, has now been implemented in FYDO. This includes:

- All newly introduced item numbers
- Updates to existing banding levels
- Changes to procedure descriptions

These updates have been applied in line with the latest release, unless your facility's System

Configuration settings indicate that you have opted out of automatic updates.

Please note: Any **discontinued item numbers** will need to be **manually deactivated** by your facility **after** billing for procedures performed **prior to 1 July 2025** is complete. This ensures those codes remain available for historical billing purposes until no longer required.

Other Updates within FYDO from 1st July

The following updates were also implemented within FYDO from 1st July 2025

- MBS Items
- DVA Accommodation
- Turbo Grouper

If you have any questions or require assistance, please don't hesitate to reach out.

FYDO Hospital Update – 26/06/2025

New Token

FYDO has introduced a new token for the **Other Notes** field to accommodate the varying formatting preferences of different hospitals. While some hospitals prefer notes in color, italics, bold, etc., others opt for a more simplistic format. To address these differences, we have developed a new token system:

- **<<Note>>**: *Is the existing token that all templates will be utilising*. This token applies the layout (alignment, size, and font family) from the **template**, while adopting the formatting (color, bold, italics, and underline) from the **appointment** screen.
- **<<Notes2>>**: This token applies both the layout (alignment, size, and font family) and the formatting (color, bold, italics, and underline) from the **template** exclusively.

These updates have been incorporated into the **WIKI Manual** Tokens – Hospital – FYDO Wiki
