

[FYDO Clinic Update - 04/06/2026](#)

SMS Improvement

Previously, if an Automated SMS had already been sent for a particular appointment date, and a new appointment was then created within that same timeframe, the scheduled Automated SMS would send immediately for the new booking.

To give users more control over when this is sent, the **Confirmed** field is now displayed on the **Make Appointment** screen.

This allows users to select the appropriate confirmation status while creating the booking. For example, selecting **Confirmed** at the time of scheduling will prevent the Automated SMS from being sent immediately, where applicable.

The screenshot shows the 'Make Appointment' form with the following fields:

- Date:** 04/06/2026
- Time:** 09:30 AM
- Appointment Type:** New Patient
- Make Recurring:** (button)
- Mins:** 20
- Billing Type:** Private
- Fee Level:** 4 - Private Rooms
- Confirmed:** (dropdown menu)

The 'Confirmed' dropdown menu is highlighted with a red border and contains the following options:

- Confirmed
- Left Msg
- Sent Email
- Sent SMS

A red dashed arrow points from the 'Confirmed' field to the 'Confirmed' option in the dropdown menu.

Performance Optimisation

Additional performance improvements have been implemented across FYDO, resulting in a more efficient and responsive user experience.
