

# **FYDO Clinic Update - 12/06/2025**

## **SMS Automation - Additional filter option**

An enhancement has been made to **Settings > SMS Automation**, with the addition of new filtering option. FYDO now allows users to filter SMS automation rules by **Appointment Type**, offering greater flexibility and control in message targeting. This filter option is available within the **“To Confirm Appointment”** SMS condition, making it easier to tailor confirmation messages to specific appointment types.
