

[FYDO Clinic Update 13/02/2023](#)

Medicare/DVA Billing

Users can now easily bill multiple dates of service for Medicare/DVA claims. Prior, users would bill different dates of services by creating a new invoice each time. Now, users can change the date of service for each **Item** under the **DOS** column on the **Clinic Billing** screen & when the billing is saved, FYDO will automatically create separate invoices per each different date of service.

(Please note: This is not recommended for DVA Community Nursing clients due to Community Nursing Hours/Visits will not be allocated correctly per invoice)

Edit Referral

FYDO has a new option added to **Claiming Medical** called **Edit Referral**, it is located on the **Item Details** screen under the **More Action** drop down. Users can now simply edit, delete or add another referral without having to completely rebill. Any changes made to a patients referral on this screen will also update over to the **Patient Details** screen.

Accounts - List View

A new view has been added to the patient **Accounts** screen called **List**. Compared to the **Summary** view that shows the patients list of invoices, the **List** view will show the items that have been billed for the patient.

Adjustments

Users can now add, edit or remove adjustment types for **Settings > Adjustments**.

(Please note: An adjustment type cannot be removed if it has been used before and if the name of an adjustment type is changed this will also reflect on historical data)
