## Recurring Appointment Feature

Users can now utilise the **Make Recurring** feature to add multiple bookings for the same patient on a **daily, weekly, monthly** or **yearly** basis. Appointments can even be made on certain days of the week, e.g. Mondays, Wednesdays and Fridays.

The screenshot displays the 'Make Appointment' interface. On the left, a patient profile for 'Brooks, Bob' is shown with details like MRN (110), DOB (21/06/1962), and Address. The main form area is titled 'Appointment Details' and includes fields for Location (Kloe's Private Clinic), Doctor (Smith, John), Date (14/01/2025), Time (10:30 AM), Appointment Type (Standard), Billing Type (Medicare), and Fee Level (1 - MBS 100%). A red arrow points to a 'Make Recurring' button located near the time field. Below the main form, a modal window titled 'Recurring Appointment' is open, showing options to set the appointment to repeat 'Daily', 'Weekly', 'Monthly', or 'Yearly'. The 'Repeats' dropdown is currently set to 'Daily'. The 'Repeat Every' field is set to '1' day. The 'Start' date is '14/01/2025'. The 'End' section has two options: 'After 1 occurrence' (selected) and 'On 14/02/2025'. At the bottom of the modal are 'Cancel' and 'Save' buttons.

## Patient Screen Improvements

A great new feature has been introduced to the **Patient Screen** to avoid simultaneous edits by multiple users. If a record is being edited, other users attempting to access it will receive a pop-up notification and will be prevented from making changes.

Additionally, if a user has the Patient Screen open, and changes are made to the record while they are viewing it, they will be alerted when they click "Edit". This ensures they are aware of any updates to the information.

### Alert: Details Updated

The Patient details you were viewing has been updated. After clicking 'Edit', the details may appear differently. Please review the latest changes carefully before proceeding.
