Patient Screen Improvements

A great new feature has been introduced to the **Patient Screen** to avoid simultaneous edits by multiple users. If a record is being edited, other users attempting to access it will receive a pop-up notification and will be prevented from making changes.

Additionally, if a user has the Patient Screen open, and changes are made to the record while they are viewing it, they will be alerted when they click "Edit". This ensures they are aware of any updates to the information.
