

# [FYDO Clinic Update - 19/03/2026](#)

## Automated SMS Addition

A checkbox has been added under **Settings > SMS Automation** to enable SMS messages to be sent on weekdays only.

If “**Week days Only**” is not selected, FYDO will function as it always has. For example, if an automated SMS is scheduled for **1 day prior to the procedure**, a patient booked for Monday will receive their SMS on Sunday.

However, if “**Week days Only**” is selected, the same SMS will instead be sent on the **preceding Friday** for a patient booked on Monday.

The same is also applicable for the **Post Discharge** Automated SMS type for SMSs scheduled following the patients discharge.

Week days Only

## Logs Improvement

FYDO has introduced an audit log for item numbers within **Settings > Logs**. This enhancement enables users to track when items are added, removed, or marked as inactive.

## OPV On Import

We’ve introduced a new option for claims import clients to run an OPV check on import files prior to claims being imported to FYDO.

- FYDO will automatically flag any patients who fail the OPV check
- Errors are identified before submission
- Users can correct and re-import claims

This feature is optional. If you’d like it turned on for your clinic, please contact our Support Team and we’ll enable it for you.
