FYDO Clinic Update – 25/06/2026

Email Set Up required for Documents & Invoices

We’re pleased to let you know that FYDO’s new email integration is now live and available to use when sending **Documents & Invoices**.

This new feature allows FYDO to securely send emails directly through your Microsoft 365 (Outlook) account, offering improved reliability, security, and better alignment with your organisation’s IT policies.

To continue sending emails from FYDO Documents & Accounts, you will need to verify the email address you wish to send from in your FYDO profile. Please follow our setup guide to complete this process.

In addition, FYDO now supports customised email footers, including the option to add your company logo. Facilities can set up a universal footer for all users, or individual users can create their own personalised footer.

Please refer to our WIKI Manual for step-by-step setup. If you have any questions or need assistance, feel free to reach out.
