

[FYDO Hospital Update - 03/10/2024](#)

Billing Status - Show Not Billed Only Report

The **Billing Status Report** now offers even MORE useful options in the Right-Click Menu with the addition of the **Edit Appointment, Admission and Discharge Screens**. These new options will be especially helpful for our rehabilitation and mental health hospitals.

Arrears Report Improvements

The **Arrears Report** now separates **Workers Compensation** and **Third-Party** episodes based on the responsible party for billing. This new layout will assist in outstanding debt recovery, enabling users to quickly identify who is responsible for the account.

Appointments Report Improvements

A new filter has been added to the **Appointments Report**, allowing episodes to be filtered according to the **Status of the Episode**. This enables users to obtain data on **Booked** appointments, **Admitted** episodes, and more.

Clinical Indicators Report Improvements

The **Clinical Indicators Report** now has a **Health Fund filter** and displays the Health Fund for each episode in the report.

Coding Audit Log

A new **Audit Log** has been added to track the **initial coding** of an episode. All existing audits for edits to the coding screen and episode grouping remain unchanged.

Items Improvements

Users can now easily identify **Type B** and **Type C** procedures from the **Settings > Items** with an additional column for **Day Type**. A new filter has also been introduced, allowing users to select and display items based on their **Patient Class Same Day Classification**.

Entitlement Card Expiry Date

The **Expiry Date Field** for the **Entitlement Cards** has been updated to follow the DD/MM/YYYY format, in line with current requirements. For expiry dates that are still shown as MM/YYYY, users will need to enter the last day of the expiry month.

Cancelled Theatre Roster Improvements

Users can now **cancel** a **Theatre Roster**, due to surgeons leave etc., and can **book another surgeon** in the same theatre for the same time slot.

My Health Record (MHR) Consent

My Health Record consent can now be obtained from patients on Preadmit, and this information can be automatically populated into the FYDO Patient Screen. If you'd like more information about adding the MHR Consent question to your hospital's Preadmit Form, please contact our friendly staff.

New API

There is a **New API** available that provides Other Services information.

Bug Fix

The issue that some users experienced when allocating patient beds has now been resolved.
