

# [FYDO Hospital Update - 06/09/2024](#)

## Session Expiry Alert

FYDO will now provide users an alert **2 minutes** prior to their **sessions expiring**, based on the hospital's individual System Configuration. This alert gives users the option to select **Keep Alive** to extend their session. If **Keep Alive** is not selected within the final 2 minutes, FYDO will automatically log out the user as per current protocol.

## OPV & IHI Fields

Following wonderful feedback from our users, we have decided to swap the order of the **Individual Healthcare Identifier (IHI)** and the **Online Patient Verification (OPV)** fields for ease of use and functionality of the Patient Screen.

## Admission Screen

The **Rehab Status** field, on the Admission Screen, has been renamed **Program Status** to better accommodate our diverse user base. Additionally, the option **Middle** has also been amended to **Middle / Continuation**.

## Unbilled Revenue Report

The **Unbilled Revenue Report > Summary** has been enhanced to show the predicted revenue for each **Other Services (OS) Category**.

## Cancelled Episodes Report

Patient episodic **Health Fund Details** have now been added to the **Cancelled Episodes > Excel - Raw Data Export** Report.

## Doctors Insurance Field

The **Insurance** field, on the **Doctors** details page, now includes pre-populated options for the most popular Insurance Companies. This field also allows free text entry, so additional companies can be typed in if required.

## **Webhooks**

All episode webhooks now include current ward and bed details.

## **Bug Fix**

The issue that some users were experiencing with the FYDO **Drag & Drop** feature have now been rectified.
