

# [FYDO Hospital Update - 07/08/2025](#)

## Improved workflow for creating an IFC

Wanting to generate an IFC for a patient that is NOT booked for an appointment yet? You can now do this directly from the patient screen, eliminating the need to navigate back to the Patient List Screen. This new feature is accessible by clicking on the three dots on the right-hand side of the patient screen which will generate a drop-down menu where you will see this option.

Users will need to add additional information while using this feature, as it isn't linked to a particular episode with pre-populated item numbers etc.

## Body Stats

FYDO has introduced a new **Body Stats** tab, now available within the **Clinical** section of the **Patient Screen**. This feature allows users to record a patient's height and weight, with the system automatically calculating the Body Mass Index (BMI). Users can also assign a start date to these measurements, accommodating variations across different admissions.

228 - FLINSTONE, Frederick ~ Fredy (08/11/1959 - 65)

Total 2,850.00

Pending 2,850.00

Height(cm)	Weight(kg)	BMI	Stat Date	Created Date/Time	Added By
175.00	68.50	22.37	06/08/2025	06/08/2025 09:29:33 AM	Madaleine James (Altura)

20 Records/Page

Records 1-1 of 1 (Page 1 of 1)

If height and weight data are entered during the **Preadmit Admission Form** process, they will automatically transfer to FYDO and be stored within the Body Stats section.

Additionally, user permissions for this feature can be managed within **User Groups**, with access levels configurable to **Deny**, **Read**, or **Read and Write**.
