

FYDO Hospital Update - 09/05/2025

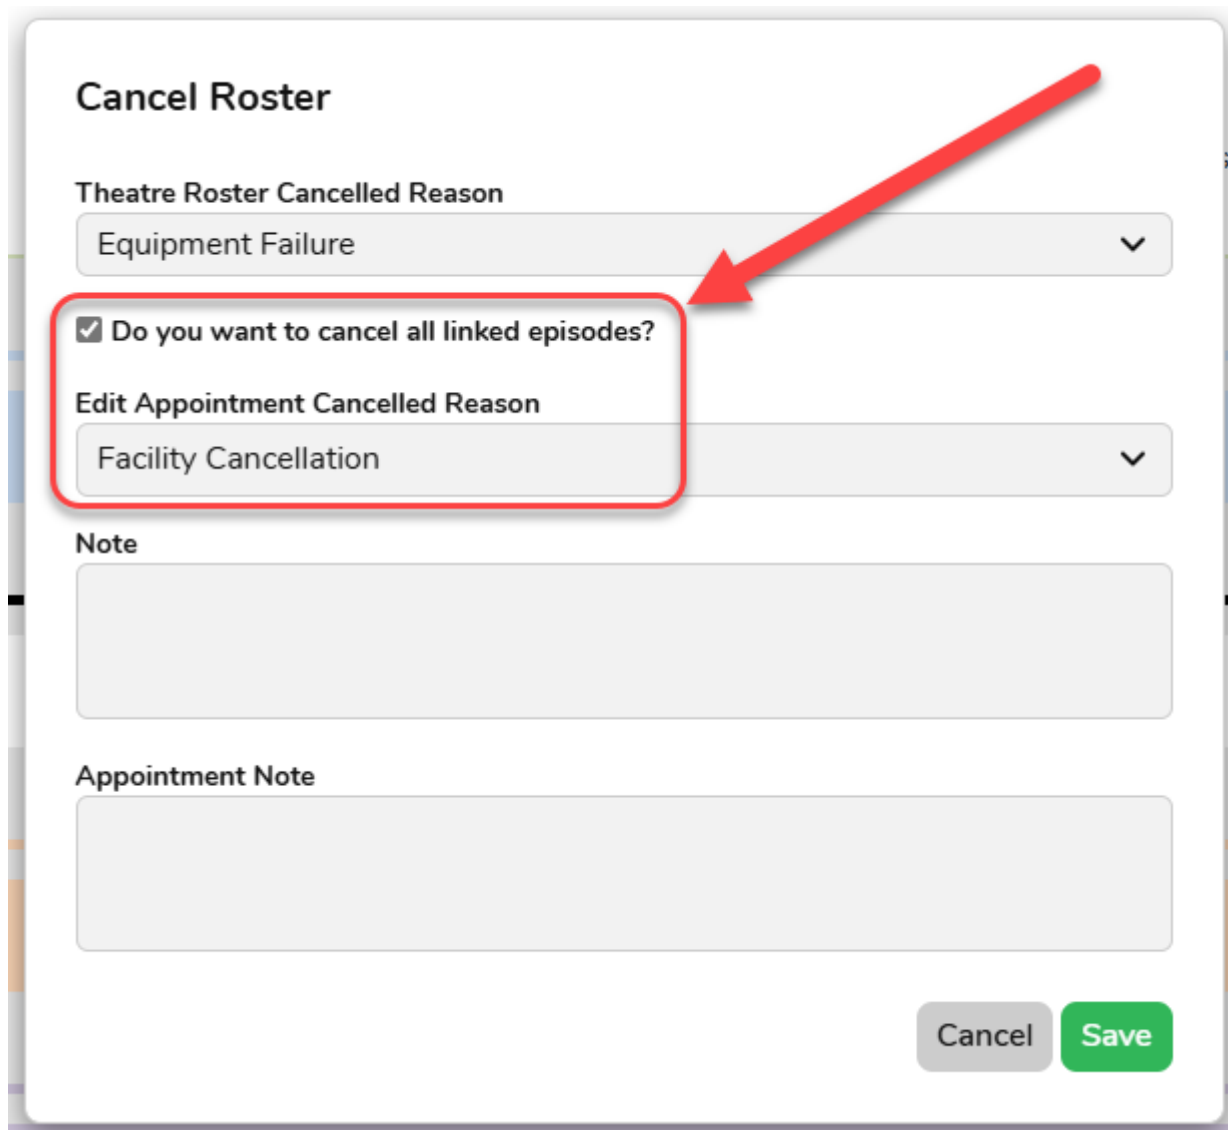

Patient Alerts Flag

The **Patient Alerts Flags**, generated from **Preadmit**, can now be added to **Custom Views** on the **Appointment Screen**. This feature allows staff to easily see items that have triggered alerts while patients complete their online admission forms. Once added to a Custom View, simply hover over the icon to view the alert details.

Cancelling Theatre Bookings

Facilities can now **Cancel** entire **Theatre Bookings** in one action using a new feature that allows all episodes **linked** to a specific Theatre Booking to be cancelled simultaneously. Users can select a **Cancellation Reason** from the drop down, which will be applied to all linked Episodes. This is a time-saving feature where an entire doctor's list needs to be cancelled. This feature also works in reverse, allowing entire lists to be reinstated if needed.

Cancel Roster

Theatre Roster Cancelled Reason
Equipment Failure

☒ Do you want to cancel all linked episodes?

Edit Appointment Cancelled Reason
Facility Cancellation

Note

Appointment Note

Cancel Save

The image shows a web form titled "Cancel Roster". It contains two dropdown menus for "Theatre Roster Cancelled Reason" (set to "Equipment Failure") and "Edit Appointment Cancelled Reason" (set to "Facility Cancellation"). A red box highlights the checkbox "Do you want to cancel all linked episodes?" which is checked, and the "Edit Appointment Cancelled Reason" dropdown. A red arrow points from the top right towards the checkbox. Below these are two text input fields labeled "Note" and "Appointment Note". At the bottom right are "Cancel" and "Save" buttons.

Arrears Report API

A new **API** is available to obtain information from the **FYDO Arrears Report**.
