

FYDO Hospital Update - 10/10/2024

Coding Screen

We are excited to introduce a new **'Save and Continue'** button on the Coding Screen, enabling users to save their progress while remaining in edit mode.

The screenshot displays the FYDO Hospital Coding Screen interface. At the top, there is a teal header bar with the text "Indicator" and "Action". Below this, there is a dropdown menu and a red "X" icon. The main area contains several input fields and buttons. A red arrow points to a green button labeled "Save & Continue", which is highlighted with a red box. Other buttons visible include "Show MBS", "Coding Assist", "Save", and "Cancel". At the bottom, there are fields for "MDC", "Date Grouped", "DRG Version", and a "Select" dropdown, along with a "Clear Groupers" button.

APIs and Webhooks

Changes have been made to the Patient and Episode, Webhooks APIs and to include Patient Pronouns and Previous Names. Episode Webhooks and APIs now include the Arrived and Ready for pick up times.

Bug Fixes

- The issue with dragging and dropping appointments to the same time slot has been resolved.
- The issue with verifying patient Concession Cards on the patient screen has been resolved.
