## Casebase Fees Import

Casebase Fees can now be imported directly from an **Excel Spreadsheet**. This fantastic time-saving feature simplifies the process of importing large, Casebase health fund contracts.

MBS	Casebase	Procedure	Type	DVA	Outlier Days	Outlier Rate	Casebase	Procedure	Type	DVA	Outlier
13212	1,000.00	0.00	Standard	0	0	0.00	0.00	0.00	Standard	0	
13215	500.00	0.00	Standard	0	0	0.00	0.00	0.00	Standard	0	

## Revenue Report

A new **Excel - Raw Data** option is now available for the **Revenue Report**, enabling users to export revenue information **Grouped by Episode**.

This export mirrors the standard Raw Data Extract but consolidates episodes with multiple invoices into a single line, displaying revenue at an episodic level.

Please note: this option is only available when the report is generated by **Discharge Date**.

## New Invoice Override Feature -

Building on Phase 1 of this feature release in [FYDO Hospital Update - 14/11/2024 - FYDO Wiki](#), the

**Invoice Override** function now impacts the **Billing Status > Show Not Billed Only** Report.

Facilities that are unable to raise an invoice for certain episodes can now use the Invoice Override feature to exclude these episodes from the Show Not Billed Only report. For instructions on how to apply the Invoice Override function, please refer to the newsletter linked above.

Episodes marked with Invoice Override will be excluded from the **Billing Status > Show Not Billed Only** Report by default. However, these episodes can still be viewed by unticking the **Excludes Invoice Override** checkbox.

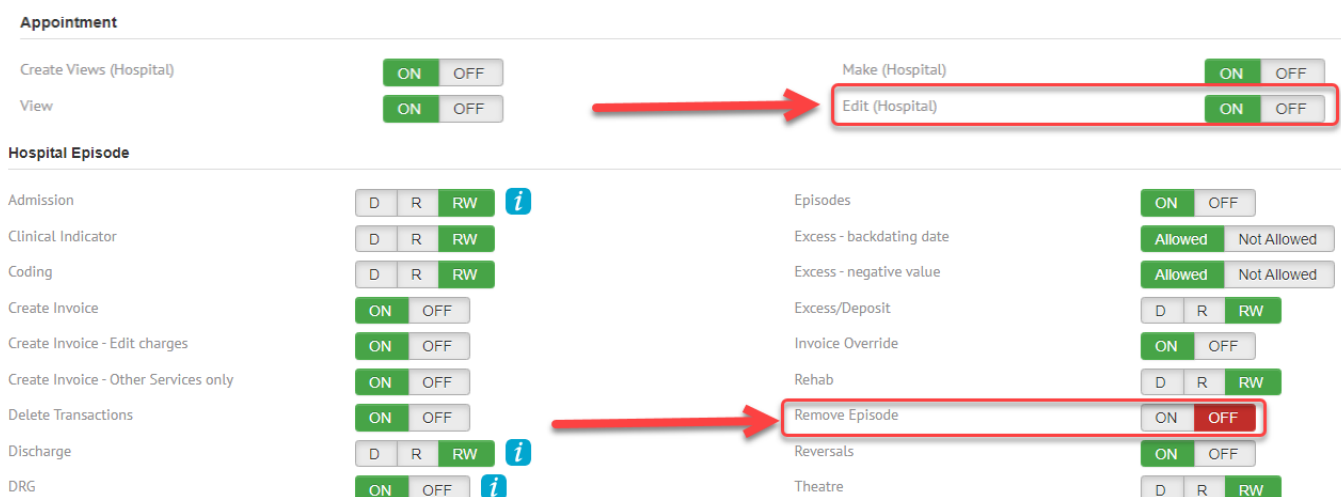

The screenshot shows the 'Billing Status Report' interface. A red arrow points to the 'Excludes Invoice Override' checkbox, which is currently checked. Other filters include Location, Doctor, Fund, Theatre Complete, Coding Complete, Report Types, Patient Category, and Date between.

## User Group Access Levels

User Group settings have been revised to improve usability and workflow. The following access levels have been updated:

- **Appointments > Edit (Hospital)** - Grants permission to edit hospital appointments
- **Hospital Episode > Remove Episode** - Grants permission to remove/delete episodes

Please ensure that these user groups are correctly set up for your facilities requirements.

The screenshot shows the 'User Group Access Levels' configuration page. Red arrows point to the 'Edit (Hospital)' checkbox under the 'Appointment' section and the 'Remove Episode' checkbox under the 'Hospital Episode' section.
