

[FYDO Hospital Update - 13/03/2025](#)

New IFC Template Defaults

Following our announcement earlier this week, we're pleased to confirm that the new feature allowing facilities to have both an **Insured Default Template** and an **Uninsured Default Template** has now been implemented in FYDO.

Chart Tracking Improvements

We've added a new feature to **Chart Tracking** that allows facilities to **Request** charts. This action works similarly to a **Chart Movement** but adds a special **Request flag**, making it easy for other users to identify which charts need to be collected and where they should be moved within the facility.

To further enhance this feature, we've made several additions to the **Chart Tracking Report**:

1. **Filter Option:** Users can filter the report to view **All Types**, **Request Only** or **None Request**.
2. **Improved Identification:** Requested charts are now easily identifiable on the report.
3. **Multi-Select Capability:** Users can select multiple entries directly from the report.
4. **Bulk Actions:** A new field allows for multiple charts to be actioned at once to either **Return Bulk Charts** or **Covert Bulk Charts to Loan**.

Episode Stats Report

A new **Order By** option has been added to the **Episode Stats Report** when run by **Detail**. This option allows patients to be ordered by **Health Fund** followed by **Discharge Date**.

Waitlist Additions

Users can now add appointments directly from the **Waitlist!** This new feature is available in the **Right-Click Menu** when using the **Appointments Screen**.

Selecting this option will open a pop-up displaying all **Waitlist patients available for the selected day**. Their mobile phone number is displayed to make it quick and easy to contact the patient if needed.

Double-clicking on a patient will initial the **Make Appointment Screen**, where details can be added to complete the booking.

Once the booking is made and the user clicks **Save**, another pop-up will appear, prompting them to decide whether to **Delete from waitlist** and/or **Delete Future Appointments** - ensuring a seamless and efficient transition from Waiting to Booking.

New Token

A **new token** is available to display information about a patient's **previous admissions**. This token simply indicates whether a patient has had a previous admission with a **Y** (*Yes*) or **N** (*No*).

This new token is **<<PatPrevEpi>>** and for a full list of patient tokens please visit our wiki [Tokens - Patient - FYDO Wiki](#)
