

[FYDO Hospital Update - 13/06/2024](#)

Informed Financial Consent (IFC) Tokens

Facilities are now able to add the **File Number** and **Doctors Contact Phone Number** to their IFC templates.

1. **File Number** <<IFCFileNum>>

This information is populated from the **Patient Screen** field called **File Number**

2. **Doctors Contact Phone Number** <<IFCDocPh>>

This information is found in **Settings > Doctors** for each individual **Doctor**

An example of these new tokens on an IFC are as below:

Revenue Report

The **Number of Nights** has been added to the **Revenue Report > Excel - Raw Data Export**.

Billing Status Report > Show Not Billed Only

Users will now be able to efficiently access the **Certificates Screen** from the **Billing Status Report > Show Not Billed Only Report** using the Right-Click Menu.

Patient Stats Report

If a user tries to run the **Patient Stats Report** for any data that falls outside the restrictions assigned to them, in **Settings > User**, they will now be shown a pop up of the categories they **do** have access to.

API Key

FYDO now has the ability to provide multiple API Keys, eliminating the need for third parties to share keys. Each API Key now includes a user field where facilities can label the user of each key. This enhancement improves control over disabling third party access and quickly identifies those

that possess a key.
