

# FYDO Hospital Update - 13/2/23

## Printing Fees

FYDO now offers users the ability to print out health fund or contracted fees. This can be done by going to **Settings > Fee Setup** and selecting the **Print** option in the top right corner. The option to print the current fees or the old fees are both available.

## Length of Stay Report Additions

The Length of Stay Report can now be Ordered by **Time From**. This option will place the episodes in order of the first time selected. For example, in the demo below, by Admission Time.

The **Length in Minutes** has also been added to the report when users **Export to > Excel - Raw Data** to assist with data collection.

## NSW Health amendments

NSW Health does not require the patient marital status to be included in the data extract unless the episode is a mental health admission, so we have removed the mandatory requirement.

## Bug Fix

Alert for Multiple Theatre Visits is showing on the **Theatre Screen** again.
