

FYDO Hospital Update - 15/6/2023

End of Day Banking

The End of Day Banking has been relocated to the main menu. This is to assist in easy access for staff performing this task, as they no longer need to enter the settings menu.

The permissions associated with the End of Day Banking have not changed. However, they have also been relocated in the User Groups to come under their own heading.

A screenshot of a user interface showing a list of permissions. The first item, "End Of Day Banking", is bolded. A red arrow points to this item. To its right are three buttons: "D", "R", and a green button labeled "RW". Below this is a section header "Hospital Episode". Under "Hospital Episode" are two items: "Admission" and "Clinical Indicator". Each of these has a "D", "R", and "RW" button to its right. The "RW" button for "Admission" is highlighted in green, and the "i" icon is to its right. The "RW" button for "Clinical Indicator" is also highlighted in green.

Billing Status Report

There has been an addition to the **Billing Status Report** when run for **Show Not Billed Only** that allows the user to **Exclude Cancelled Episodes**.

This option will not be checked by default. However, once the user ticks this box, the cancelled episodes will be excluded from the report.

Update

Introduction of Gender

As of July separations, it is Optional for Victorian Hospitals to report the patient's gender to the VIC Dept of Health, which will become mandatory from July 2024.

Whilst the 'Gender' field is currently only a requirement of VIC Hospitals, we have made the field available for all hospitals to use if they wish, which is an additional field to Sex.

Below is the official Reporting Guide from VIC Health regarding the use of Gender:

Reporting guide

Gender is a social and cultural concept. It is about social and cultural differences in identity, expression and experience as a man, boy, woman, girl, or non-binary person.

The terms sex and gender are interrelated, and are often used interchangeably, however they are distinct concepts:

- Sex is understood in relation to sex characteristics. Sex recorded at birth refers to what was determined by sex characteristics observed at birth or in infancy
- Gender is about social and cultural differences in identity, expression, and experience.

A person's gender may differ from their sex and may also differ from what is indicated on their legal documents. A person's gender may stay the same or can change over the course of their lifetime.

1 Man, or boy, or male

A person who describes their gender as man, or boy, or male.

2 Woman, or girl, or female

A person who describes their gender as woman, or girl, or female.

3 Non-binary

A person who describes their gender as non-binary.

Non-binary is an umbrella term describing gender identities that are not exclusively male or female

4 Different term

A person who describes their gender as a term other than man/boy/male, woman/girl/female or non-binary.

5 Prefer not to answer

A person who prefers not to respond on how they describe their gender.

9 Not stated or inadequately described

Includes:

Question unable to be asked such as when the patient is unconscious or too unwell.

Assigning a Gender in FYDO

Automatic mapping has been put in place, so when Male is selected as Sex, Gender will automatically change to "Man, or boy, or male" and Female Sex has been mapped to "Woman, or girl, or female." However, the Gender field can be overwritten to any other value provided.
