

[FYDO Hospital Update - 16/04/2026](#)

PreAdmit Addition

Users can request a default setting to be set up to automatically include or exclude the HC21, while still retaining the flexibility to manually select or deselect the HC21 when completing the IFC.

Patient Alerts Improvement

An “All” view has now been introduced in Patient Alerts, allowing users to see all alerts rather than only those applicable to a specific group. Patient Alerts will now default to the “All” view when opened.

Additionally, permissions have been implemented within User Groups for each type of patient alert, including Admin, Clinical, Post and All.

Patient Alerts - View Admin Flags ON OFF

Patient Alerts - View Clinical Flags ON OFF

Patient Alerts - View Post Flags ON OFF

New Permissions

Permissions have now been introduced to control the ability to split invoices and reallocate transactions within Episodes. These permissions are enabled by default, so you will need to review and manually disable them for any user groups where this access should be restricted.

Split Transaction ON OFF

Reallocate Transaction ON OFF

Performance Optimisation

Performance improvements have been implemented for the monthly view in Theatre Rosters, resulting in a more efficient and responsive user experience.
