

[FYDO Hospital Update - 19/03/2026](#)

Automated SMS Addition

A checkbox has been added under **Settings > SMS Automation** to enable SMS messages to be sent on weekdays only.

If “**Week days Only**” is not selected, FYDO will function as it always has. For example, if an automated SMS is scheduled for **1 day prior to the procedure**, a patient booked for Monday will receive their SMS on Sunday.

However, if “**Week days Only**” is selected, the same SMS will instead be sent on the **preceding Friday** for a patient booked on Monday.

The same is also applicable for the **Post Discharge** Automated SMS type for SMSs scheduled following the patients discharge.

The screenshot shows the 'SMS Automation' settings window. It includes a title bar with a close button (X). Below the title bar, there are two dropdown menus: 'Condition' set to 'To Confirm Appointment' and 'Template' set to 'Time Calculations'. At the bottom, there is a checkbox labeled 'Week days Only' which is currently unchecked and is highlighted with a red rectangular box.

Logs Improvement

FYDO has introduced an audit log for item numbers within **Settings > Logs**. This enhancement enables users to track when items are added, removed, or marked as inactive.

Performance Improvements

We have implemented further performance improvements across key FYDO functions, including patient editing, appointment management, inpatient screen edits, and hospital claiming.

These updates form part of our broader initiative to optimise system performance, reduce response times, and enhance overall usability across the platform.
