

FYDO Hospital Update - 19/07/2023

New Feature added to Procedure List / Procedure Notes

Phase 1

FYDO Users are now able to add default settings to each item in the Procedures List. This exciting new feature will eventually mean that when a certain procedure is added to an appointment, the following fields can be populated automatically!

- Anaesthetic Type
- Appointment Length
- Item Numbers
- Other Services Codes

This wonderful new feature will improve efficiency & reduce repetitive data entry as users will not need to add as much information to the appointments manually for predictable procedures.

As this is only Phase 1, the fields have been added to the **Settings > Procedures** so that facilities have time to add the required options into their list.

However, the function won't be implemented into the appointments screen until a future update.

So keep an eye on these newsletters for when Phase 2 is added!

New option in Overnight Accommodation Fees

There has been an additional tick box incorporated into the Overnight Accommodation Fees that allows facilities to **Exclude Private Room add on**.

This function will be required if a facility **IS** allowed to charge a Private Room Addon for most of their accommodation types & have therefore ticked the **Add Private Room Line on the Invoice (overnight only)** in the Other Settings tab.

The new tick box allows for the **Add Private Room Line on the Invoice (overnight only)** to be counteracted for certain accommodation types if required. Essentially turning the feature off & allowing the accommodation type to function without a private room add on.

Added fields to the Print List Raw Data Extract

There have been additional fields added to the Print List > Export to Raw Data

New patient fields include:

- Address
- Email Address
- Health Fund Details
- Health Fund Number
- Pension Number
