

[FYDO Hospital Update - 19/09/2024](#)

Deleted Transaction Enhancements

Transactions that have been deleted after being cleared in the **End of Day Banking Report** will now be listed separately when running the **Reports > End of Day Banking** for ease of identification.

A new column has been added to the **Deleted Transactions > Excel - Raw Data Report**, showing the time and date the deleted transaction was cleared in the End of Day Banking.

Other Services Revenue Report

Our new feature, which allows users to run the Episode Stats Report by **Health Fund (Group)**, has now been extended to our **Other Services Revenue Report!**

Users can now run this report for the entire **Head of Fund Group** (*by select the Head of Group Fund from ABOVE the line*) or continue to run it for an **Individual Health Fund** (*by selecting the individual fund from BELOW the line*)

For single-location databases, this option will be available when the report is opened. However, multi-location databases will need to select the desired **Location** first to enable this feature in the Fund dropdown.

Linking Sex, Gender & Title Fields

Currently, the Sex, Gender & Title fields are linked to auto-populate based on the data entered into one of the fields. This feature saves time during data entry by reducing the amount of information users need to input, while still allowing for manual adjustments if necessary.

However, a new feature has been added to **Settings > Field Defaults** that allows facilities preferring staff to enter each piece of information separately for accuracy to disable the linking of these fields and choose **Gender Not Linked to Sex**.

Coding Screen Improvements

Users are now able to view the Proc Notes from the coding screen with our convenient new hover.

Processing IHC Fund Responses Amendments

Previously in FYDO, when receiving Processing Reports from the health funds, any claim returned with an approved amount of \$0 was automatically marked as Rejected. However, due to the frequent manual reassessment by funds such as Medibank Private, we have updated this logic to now display only the assessment provided by the fund.
