[FYDO Hospital Update – 20/03/2025](#)

New User Group Access Levels

We've added new options to the **User Group > Access Levels,** giving facilities greater control over user permissions:

- **Create IFC –** Allows users to generate IFCs

- **Create IFC – Edit Charges –** Allows users to make changes to the fees while creating IFCs

Additionally, new access level options have been introduced for the **Data I/O** function.

By default, these new options will mirror the current access levels that all users have in FYDO. Facilities can adjust these permissions as needed.

New Unbilled Revenue Report API

A new API has been created, allowing information to be retrieved for the **Unbilled Revenue Report** by **Accrual.**

New Patient Alerts Option

Users can now efficiently access a patient's **EMR** directly from the **Patient Alerts** Screen using the **Right-Click Menu.**

New Relationship Option

Child is now a pre-populated option when entering information for **Next of Kin, Emergency Contact, Contributor** or **Pick Up Person** information.

End of Day Banking Improvements

The **MRN** is now displayed in the **End of Day Banking** Report as an additional form of identification.
