

[FYDO Hospital Update - 20/08/2026](#)

Patient Search Addition

FYDO now allows you to search for patients using their **Membership Number**. To utilise this new search option, simply enter **MEM:** followed by the patient's membership number into the search bar.

The screenshot shows the 'Patient List' interface. At the top, there are radio buttons for 'Patient' and 'Other', with 'Other' selected and highlighted by a red box. To the right is a search bar containing 'MEM:987654321'. A dropdown menu is open, displaying patient details: File #: 12345, Admission #: a:1001, Invoice #: Inv:123, Mobile: 0415 123 123, Medicare: 2111-11111-1, Ext ID: N-123456, and Membership #: MEM:123456789 (highlighted with a red box). Below the search bar is a table with columns: Surname, First Name, Address, and Suburb.

Surname	First Name	Address	Suburb
CLAUS	Sandra	123 The North Pole	BRISBANE
DODGER	Rodger	1 Dodger Lane	ROGER RIVER
WHITE	Snow	1 Cottage Close	Snowy Plain

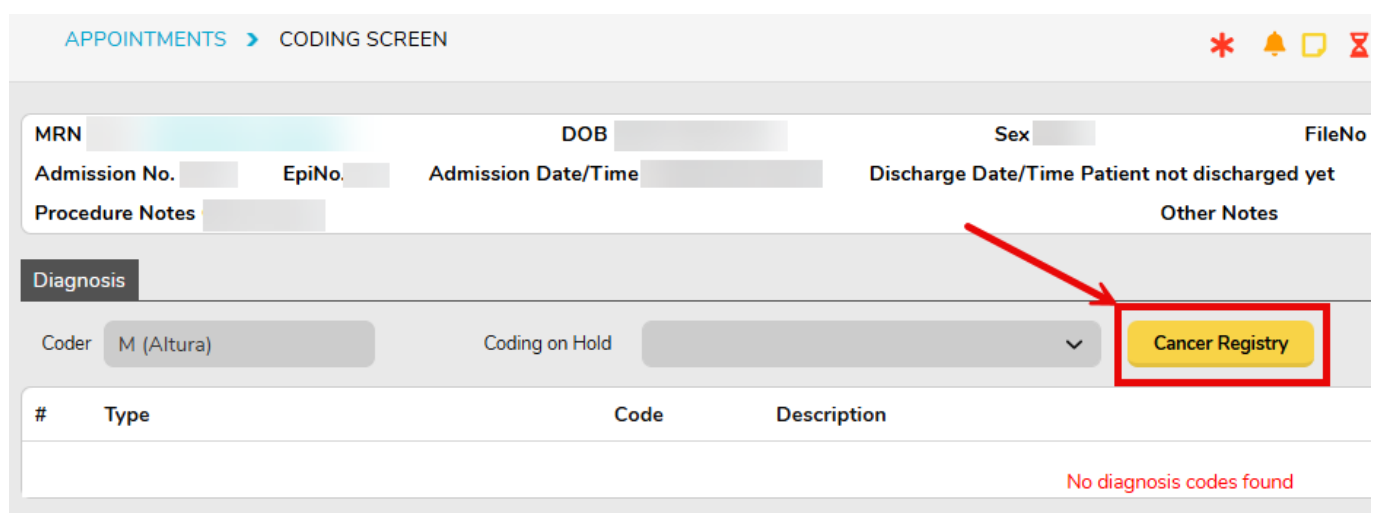

Overnight Banding Update

FYDO has introduced updated logic for DVA **Per Diem Overnight** invoices. When creating an invoice for a Per Diem Overnight charge, FYDO will now determine the accommodation charge based on the **highest-priority patient class/accommodation**, rather than using the banding as the primary factor.

The **Patient Class/Accommodation** now takes priority over the banding, ensuring that the correct accommodation rate is selected when generating the invoice.

Cancer Registry for Northern Territory

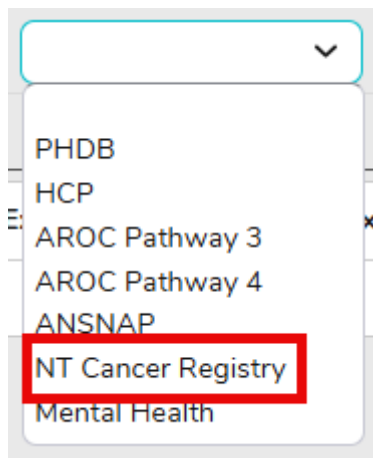

FYDO has introduced the **Northern Territory Health Cancer Registry screen**, designed to support cancer registry data entry for Northern Territory facilities.

The screenshot shows the 'CODING SCREEN' interface. At the top, there are tabs for 'APPOINTMENTS' and 'CODING SCREEN', with 'CODING SCREEN' selected. Below the tabs are various input fields: MRN, Admission No., EpiNo., Admission Date/Time, Discharge Date/Time, Sex, FileNo, Procedure Notes, and Other Notes. A 'Diagnosis' section is visible, containing a 'Coder' field with 'M (Altura)', a 'Coding on Hold' dropdown, and a 'Cancer Registry' button highlighted with a red box. A red arrow points to the 'Cancer Registry' button. Below the 'Diagnosis' section is a table with columns: #, Type, Code, and Description. At the bottom, a message states 'No diagnosis codes found'.

#	Type	Code	Description
---	------	------	-------------

We're pleased to let you know that FYDO will support exporting this data file, using the same process as the other end-of-month data extracts.

This update means that reporting to the NT Cancer Registry will be a seamless and efficient process for our Northern Territory hospitals.

New Tokens

FYDO has introduced several new tokens:

- **Tomorrow's Date** - There are two new tokens that will display **tomorrow's date** and **tomorrow's day**, based on the current system date. These can be located in our Wiki under **Tokens - Hospital > Episode Appointment Details**.

<<EpTmrw>>	Tomorrow's Date	dd/mm/yyyy
<<EpTmrwDay>>	Tomorrow's Day	e.g Monday

- **Theatre Roster** - These tokens will only pull the information from the Theatre Roster (not the Theatre Screen). These tokens can be located in our Wiki under **Tokens - Hospital > Theatre Roster**.

Theatre Roster

Only to be used in Template Headers not within the table

Token Name	Data	Notes
<<EpSessLen>>	Theatre Roster Length	Finish and start time in minutes
<<EpSessCon>>	Theatre Roster Confirmed	
<<EpStaffScrub>>	Scrub Nurse	
<<EpStaffScout>>	Scout Nurse	
<<EpStaffNurse>>	Nurse/Assistance	
<<EpStaffOtherNurse>>	Other Nurse	
<<EpStaffOther>>	Other Staff	

- **Patient's Middle Name** - These tokens will display the patient's middle initial and the patient's full middle name. These tokens can be located in our Wiki under **Tokens - Patient**.

<<patMInitial>>	Middle Initial	e.g. M
<<patMiddleN>>	Middle Name	e.g. Middle

- **HPI-O and Doctor's HPI** - This token will display the organisations HPI-O number and the Doctor's HPI number. These tokens can be located in our Wiki under **Tokens - Hospital**.

<<HIorg>>	Organisations HPI-O number
<<HIdoc>>	Doctor's HPI-I number

Bed Occupancy Report Improvement

FYDO has implemented a refreshed design for the **Bed Occupancy Report**. This new design delivers improved performance, including faster processing and loading times, while all existing data, filters, and functionality remain unchanged.

Reports / Bed Occupancy Report												Refresh
Filters												Expand
Search...												
From: 01/07/2025 to 30/06/2026												
For Location - Shaes Private Hospital, Trend Type - Year												
Ward / Bed	Jul 2025	Aug 2025	Sep 2025	Oct 2025	Nov 2025	Dec 2025	Jan 2026	Feb 2026	Mar 2026	Apr 2026	May 2026	Jun 2026

Incomplete Report Enhancement

FYDO has added a new column to the **Incomplete Report** for the **Doctor Speciality**.

This additional column makes it easier to identify the treating doctor’s speciality directly within the report, providing greater visibility when reviewing incomplete episodes and outstanding information.

Reports / Incomplete Refresh

Filters Expand

Search... From: 01/02/2026 to 19/08/2026 Uncoded Episodes for All Locations and All Patient Categories and All Doctors and All Specialities

--------------	-----	------	-------	----------	----------	-----	-----------	------	--------------	------------	----------------	-----------------	-----------------	------------	---------

MHR Improvement

FYDO will now prompt you when changing a patient’s **MHR Consent Status**, asking whether you would like to apply the change to **all episodes** for that patient.

MHR Consent Update

MHR Consent No

Existing Episode MHR Consent Details

Since you have updated the patient's MHR Consent details, select which episodes you would like to also update. We have auto selected all future episodes.

Update	Date	MHR Consent	Patient Name
☐	02/07/2026	✓	BRANSON, Richard
☐	30/06/2026	✓	BRANSON, Richard
☐	13/05/2026	✓	BRANSON, Richard
☐	30/04/2026	✓	BRANSON, Richard
☐	24/02/2026	✓	BRANSON, Richard
☐	09/01/2026	✓	BRANSON, Richard

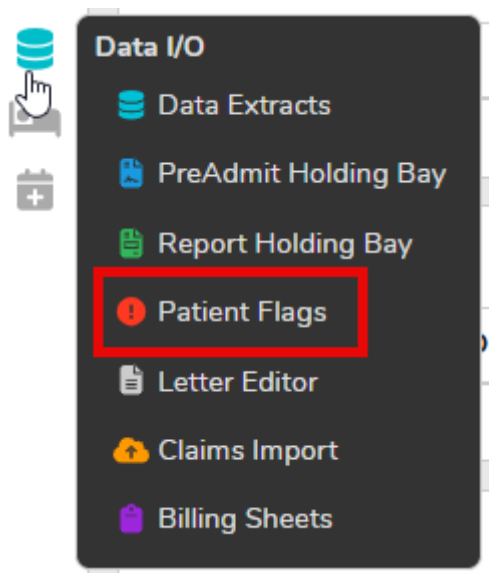

Do nothing Update Selected

This provides greater control when updating consent and helps ensure the change is applied consistently across the patient’s episodes when required.

Patient Alerts Change

To avoid confusion with the **Patient Alerts** located within the Patient Details Screen, **Preadmit Patient Alerts** will now be relabelled as **Patient Flags**.

This change is intended to make the distinction between the two features clearer and help users easily identify the correct information when working within FYDO.

In addition, amendments to **Patient Flags** will now be displayed in the **Audit Logs**. The audit log can be accessed by navigating to **Settings > Logs**. This allows users to review the history and changes associated with Patient Flags, providing greater visibility and traceability when managing patient information.
