

FYDO Hospital Update - 20/2/2023

Preadmit Additional Feature

FYDO can now import the **Emergency Contact & Pick Up Person** from Preadmit.

If the patients are asked to provide these details when they complete their online admission form, through Preadmit, we are now able to update these details in FYDO.

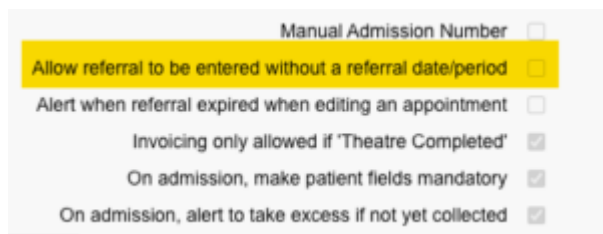

Please contact us if your facility would like to utilise this feature.

A screenshot of a web form titled 'Preadmit'. It has tabs for 'Emergency Contact' and 'Pick Up Person'. The 'Emergency Contact' tab is active, showing fields for 'Relationship', 'First Name', 'Surname', 'Mobile', 'Address', 'Suburb', 'State', and 'Postcode'. The 'Pick Up Person' tab is also visible, showing fields for 'Title', 'First Name', 'Surname', 'Mobile', 'Address', 'Suburb', 'State', and 'Postcode'. Red arrows point to the 'Emergency Contact' and 'Pick Up Person' tabs.

New Referral Date Feature

FYDO now has the ability to allow facilities the choice of either requiring a referral date or allowing staff to enter the referring doctor **without a referral date being necessary**.

This feature can be activated by selecting **Allow referral to be entered without a referral date/period** in the **Settings > System Configuration** menu.

A screenshot of the 'System Configuration' settings menu. It shows a list of settings with checkboxes. The setting 'Allow referral to be entered without a referral date/period' is highlighted in yellow and has its checkbox checked. Other settings include 'Manual Admission Number', 'Alert when referral expired when editing an appointment', 'Invoicing only allowed if 'Theatre Completed'', 'On admission, make patient fields mandatory', and 'On admission, alert to take excess if not yet collected'.

New 'End of Current Fees' feature

There is a new field that facilities can utilise in the **Fees Setup**. It allows for the **End of Current Fees** date to be entered. The next step we will undertake, in developing this feature, is to alert the user if they are trying to bill an episode that falls after the end date of the current fees. The implementation of the next development stage is expected to be in the next few weeks.

A screenshot of the 'Fees Setup' form. It shows a table with columns for 'Fee Name', 'Fee Type', 'Fee Code', 'Fee Description', 'Fee Amount', and 'Fee End Date'. The 'Fee End Date' column is highlighted in yellow. A red arrow points to the 'Fee End Date' column header.

New 'Estimated Recovery Time' feature

The **Estimated Recovery Time** can now be added to print list templates. This time calculates by adding the **Length of the Booking** to the **Booking time**.

Therefore, **Booking Time + Length of Booking = Estimated Recovery Time**.

<<EpEstRS>>	Estimated Recovery Time Booking time + Length of Booking	e.g 1315
<<EpEstRS12h>>	Estimated Recovery Time Booking time + Length of Booking	e.g. 1:15 PM
<<EpEstRS24h>>	Estimated Recovery Time Booking time + Length of Booking	e.g. 13:15

Theatre lists can then be generated in order of this **Estimated Recovery Time** using **Order of List**. This list will be beneficial as a Recovery List to enable recovery to see the patients’ order as they are expected out of theatre.
