

[FYDO Hospital Update - 22/05/2025](#)

Master Templates

FYDO now allows hospitals to “**hide**” the **Master Templates** so that they are not an option for users to select accidentally.

This setting can be amended by a user from your hospital that has access to **Settings > System Configuration** by ticking the **Hide Master Templates** checkbox. Once this is selected the master templates will not be displayed in any of the dropdowns where users are able to select from available template option, for example when creating an IFC or Invoice.

The screenshot shows the 'SYSTEM CONFIGURATION' page with the 'General' tab selected. The page contains various settings for the hospital system. At the bottom of the settings list, there is a checkbox labeled 'Hide Master Templates' which is currently unchecked. A red arrow points to this checkbox.

Certificates in Claiming Hospital

FYDO now enables access to certificates from the **Claiming Hospital > Claims & Not Yet Sent** tabs. This feature will prove valuable in the event of rejections, allowing you to quickly verify whether a certificate has been applied to a specific episode. Simply right-click to view the available options, which will now include **Certificate**.
