

FYDO Hospital Update - 27/02/2025

Payments (Hospital) Improvements

To help prevent accidental duplicate processing of ECLIPSE payments, FYDO will now notify users if they attempt to process a payment that has already been applied. This safeguard reduces errors and ensures greater financial accuracy. Additionally, an audit log will record if a staff member chooses to proceed, after the alert is triggered.

Apply Payment

This payment has already been applied; would you like to process it again? *(This may cause duplication of receipted payments)*

Yes

No
