

FYDO Hospital Update - 27/04/2023

Episode Stats Report Addition

There is now the option to **exclude cancelled patients** from the Episode Stats Report. All discharged patients are always included in the episode stats report, regardless of their cancelled status. Therefore, this new feature will assist facilities, that have cancelled admitted & discharged episodes, to obtain statistics on only patients' that have had a complete & not cancelled episode.

The screenshot shows the 'Episode Stats' report interface. A red callout box points to the 'Cancelled' dropdown menu, which is currently set to 'Selected Cancelled'. The callout box contains the following text:

Excluded Cancelled Episodes is ticked by default when the Episode Stats Report is run.

If Exclude Cancelled Episodes is un-ticked, the option to choose Cancelled Reasons is made available

The interface includes various filters and options for generating the report, such as Location, Doctor, Fund, Anaesthetist, Theatre, Specialty, Patient Category, Booking Code 1, Booking Code 2, Sex, Indigenous, Born After From, Referring Doctor, Family Dr., Procedure, Condition Onset, and DRG. The 'Report Types' section shows 'Summary' selected. The 'Based On' section shows 'Discharge Date' selected. The 'From' and 'To' dates are set to 01/04/2023 and 26/04/2023 respectively. The 'Order By' is set to 'Alphabetically'. An 'Update' button is located at the bottom right.

Bug Fix

- The issue that was preventing automatic SMSs being sent has been rectified.
