

# FYDO Hospital Update - 27/11/2025

FYDO now includes a new feature that allows users to print the Theatre List in Booking Time order. This enhancement is designed to improve workflow efficiency and provide clearer visibility of scheduled bookings.

## Print List

X

Template	<input type="button" value="Theatre list"/>
Order of List	<input type="button" value="Theatre, Date, Booking Time, Doctor, Anaesthetist"/> <small>Theatre, Date, Booking Time, Doctor, Anaesthetist, Surgeon, Patient Name, Procedure Time</small>
Theatre	Date, Estimated Recovery Time
Surgeon	Date, Theatre, Admission Time, Doctor
New Page	Patient Name
From Date	Theatre, Date, Admission Time
Time From	Theatre, Date, Booking Time
Options	<input checked="" type="checkbox"/> Include dummy appointments <input type="checkbox"/> Include cancelled appointments <input type="checkbox"/> Exclude appointments without food instructions
Copies	<input type="button" value="01"/>

In Bed Tracker, we have introduced a new shortcut option that allows users to navigate directly to the Theatre screen by right-clicking on a patient. This enhancement is intended to streamline workflow and improve ease of access.

When admitting a patient, updating the **'Transferred From'** field will automatically populate the relevant hospital information for a contracted patient. However, contract types can vary between hospitals and between different contracts.

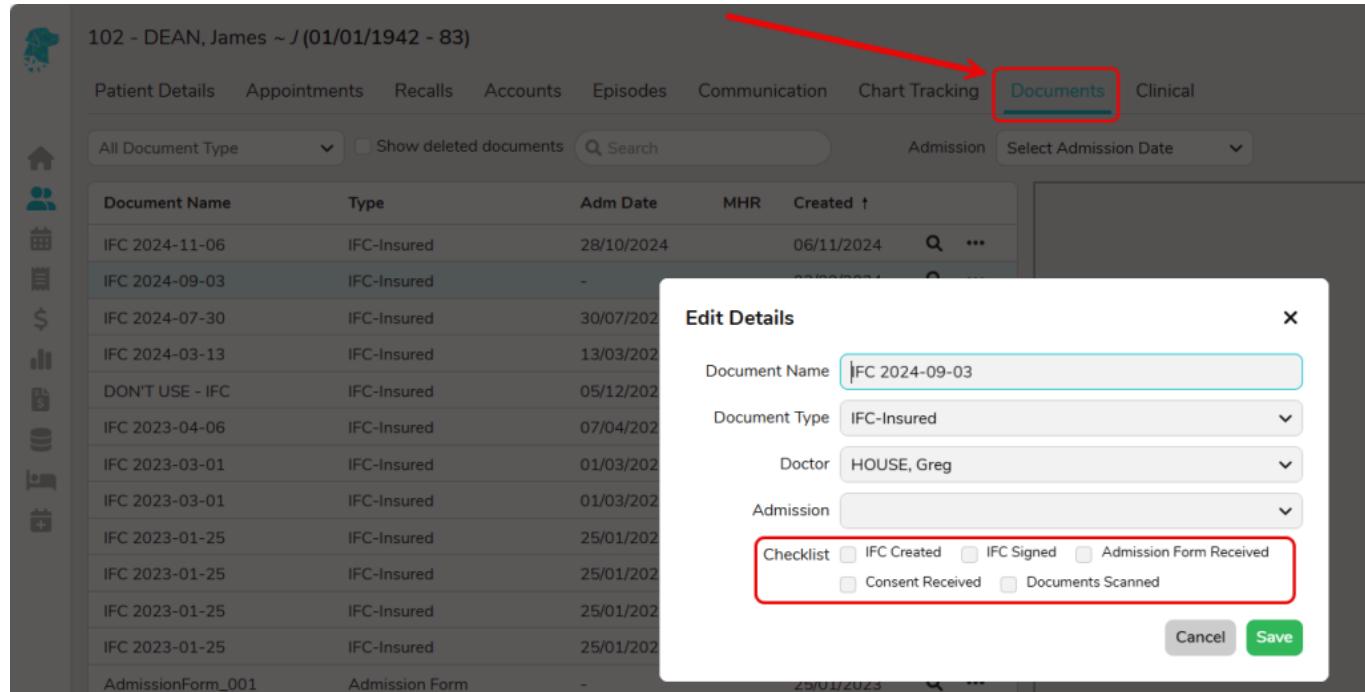

To accommodate this, we have added a new **Contract Type** section under **Settings > Hospitals**. When setting up a new local contracting hospital, you can now manually select the appropriate contract type, ensuring the system populates accurate for every admission and populates the correct data.

g Home  Contract Type **Contract Type** ?

Contract Type B	1
Contract Type ABA	2
Contract Type AB	3
Contract Type (A)B	4
Contract Type BA	5

# Documents Enhancement

Users are now able to tick **Checklist** items as they import or edit **Documents** that have been loaded. This feature allows users to easily tick certain boxes, e.g. **IFC Signed** as they are uploading the signed IFC, instead of then having to go back to the appointments screen to check the item.

The screenshot shows the EMR interface for patient 102 - DEAN, James. The 'Documents' tab is highlighted with a red arrow. A modal window titled 'Edit Details' is open, showing the document details for 'IFC 2024-09-03'. The modal includes fields for Document Name, Type, Doctor, and Admission, and a 'Checklist' section with several items. The 'Checklist' section is highlighted with a red box, showing items like 'IFC Created', 'IFC Signed', and 'Admission Form Received'.
