# FYDO Hospital Update - 28/03/2023

#### **NEW List Re-Ordering Feature**

FYDO can now re-order lists with a fabulous new feature that resembles the SimDay function **Session Priority.** This feature allows users to easily re-order patients', move all patients' appointments up at once *(in the case of a cancellation)* and set appointment times according to each appointment length.

This feature will work from the admission time of the FIRST patient on the list. It will then slot all other patients' into their corresponding admission times, according to the appointment lengths. The difference with using the List Re-Ordering feature is that it allows users to easily move a patients' appointment up or down the list **& will shuffle the other patients' admission times to accommodate.** Whereas other methods of moving appointments does not impact the admission times of any other patients'.

Click on the below image to see a little snip of the List Re-Ordering in action.

#### Fee Set Up - End of Current Fee Field

The **End of Current Fee** field is now functioning in FYDO & allows a date to be set for contracted fees to finish. Setting this date will prohibit invoices being raised for episodes that fall after the date entered.

## **Invoice on Hold Start Date Field**

The **Invoice Hold Start** date field is now functioning in FYDO. This allows health funds to be put **On Hold** from a particular date. This feature still facilitates invoicing/billing for episodes that fall

**before** the documented date, however will prohibit users from invoicing the particular fund for episodes that fall on or after the **Invoice Hold Start** date.

## **New Billing Checker**

FYDO now has a new measure in place to assist in billing day patients' & overnight patients'. Users will be unable to bill a patient if the **admission & discharge dates are inconsistent with the Patient Category.** Therefore, an episode with the same admission & discharge date will need a Patient Category of Day Only to be able to be billed. And an episode with a discharge date AFTER the admission date will need a Patient Category of Inpatient etc.

### New Casebase Multi Feature

FYDO now allows the use of the same item number twice in the Casebase Multi fees set up. This will allow Casebase Multi fees to be set up for bilateral procedures or any procedure that requires the same item number to be billed twice.
