

[FYDO Hospital Update - 31/07/2026](#)

Additions to Audit Logs

FYDO has introduced additional audit logs for item numbers under **Settings > Logs**. This enhancement allows users to track changes made in **Settings > Items**, such as Eclipse Code Mapping enabling/disabling or when Theatre Banding has been modified

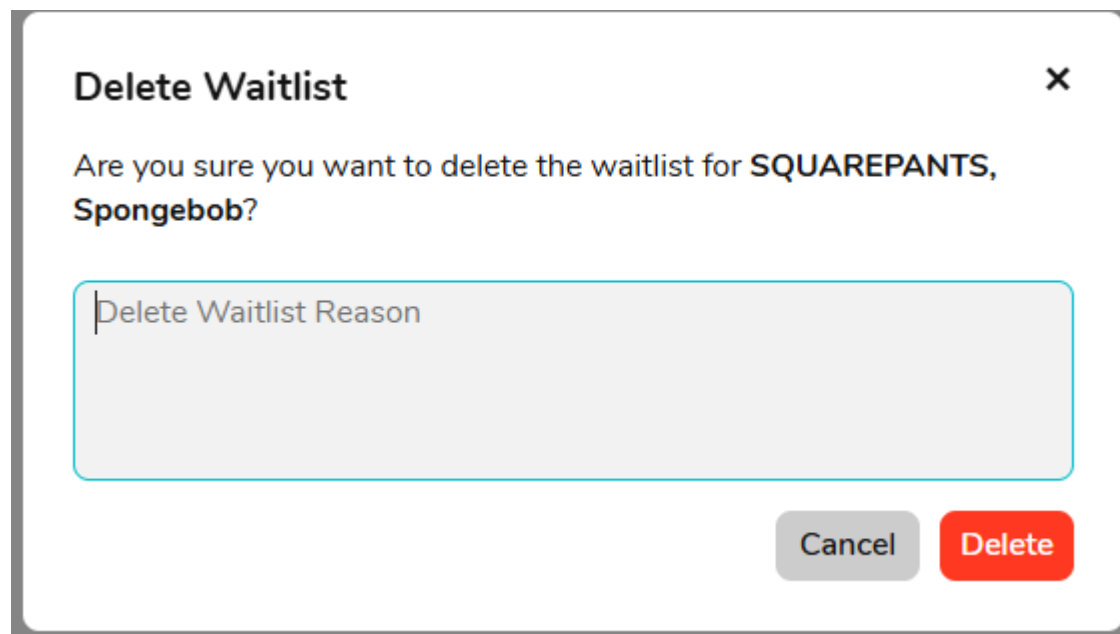

Theatre Roster Tokens

The **Theatre Staff tokens**, that originally only pulled information from the patients **Theatre Screen**, will now populate from the **Theatre Roster** information prior to the patient's admission. This enables Theatre Lists to populate and print this data before procedures commence. These fields include: Scrub Nurse, Scout Nurse, Other Nurse, Surgical Assistant, Other Surgical, and Other Staff.

Please see the following link for the full list of these tokens [Tokens - Hospital - FYDO Wiki](#)

Waitlist Enhancement

Users are now required to enter a reason when deleting a patient from the Waitlist. This enhancement has been introduced to provide greater visibility into why patients are removed from the Waitlist, helping to ensure accurate record keeping and greater accountability within the system. Phase 2 of this development will be to add this information to reports.

A screenshot of a 'Delete Waitlist' dialog box. The title bar says 'Delete Waitlist' with a close button (X) in the top right. The main text asks 'Are you sure you want to delete the waitlist for SQUAREPANTS, Spongebob?'. Below this is a text input field with the placeholder 'Delete Waitlist Reason'. At the bottom right are two buttons: 'Cancel' (grey) and 'Delete' (red).

Delete Waitlist ×

Are you sure you want to delete the waitlist for **SQUAREPANTS, Spongebob**?

Delete Waitlist Reason

Cancel Delete

Custom View Addition

Users can now add the episodic My Health Record (MHR) Consent Status to their Custom Views. This information is sourced from the consent recorded on the individual booking itself, rather than the consent displayed on the Patient Details screen, as consent may differ between episodes.

MHRC
