

Hospital Appointment Screen Custom Views - Individual View

FYDO gives users the ability to customise the Appointments Screen to allow them to view the information that is important to their role. This assists in workflow & efficiency & allows users to view different information depending on the task that they are undertaking.

All custom views that are created for each facility are available to all users. Each user is then able to select their favourite view to open as their default. These instructions will provide ideas for different views & the set up required to accomplish them. For further details on how to create custom views please see the page on [Creating Custom Views](#)

Included below are examples of **Individual View** ideas. Please see our other pages on **All & Weekly View** ideas for those view types.

Administration Pre-Operative Process

Pre-Operative Phone Calls View

Theatre View

Recovery View

Patient Contact Information View

Status View

In addition to creating the Status Custom View the user will need to ensure the desired colours are set up in

Settings > System Configuration > Hospital.

Coding View

Billing View
