Merging Duplicate Patients

When creating a patient, if the details are similar enough to a patient already in Fydo, you will receive the following message.

This message is Fydo taking measures to ensure you do not create duplicate patients. As you can see in this example, it is letting me know a similar patient was found. For Fydo to try to match existing patients, you will need to enter a minimum of:

- First Name and Last Name
- Date of Birth

If you enter just the first and last name, it will not try to find similar patients, you do need to enter the date of birth for the check to occur.

Despite this, you may realise at some point that you have a duplicate patient. If you run into this issue, read ahead to find out how to **merge** the patients together.

How to Merge Patients

First search the patient/MRN that will become obsolete, after this process, & open their Patient Info Screen.

In the top right hand corner of the **Patient Details** screen you will see a drop down menu called **More Actions**.

Edit	Bill Patient	More Actions	3
			*
	UPI	0	
			~

You will now see a screen with the patient's details and a search bar.

Merge Patient					
MRN 3445 Patient TESTER , ⁻	DOB 01/01/1990 Test	Gender Male			
Select a medical record where the patient above will be merged into. This mean MRN 3445 will not longer exist and all appointments/episodes and invoices will be moved into the selected MRN below.					
	Q Search				
		Cancel			

Simply search for the patient you wish to merge the current one with. You will see the **Patient Lookup** box, containing any patients found.

Patient Lookup						
Patient Other Cher test Search						
Sumame	Firstname	MRN	FileNo	Address	DOB	Age
Malatesta	CARL	2151.0		9/20-22 Loch Street CAMPSIE	14/09/1927	92
Tester	Test	3445		123 Test Street	01/01/1990	30
Tester	Test	3446		123 Test Street	01/01/1990	30

The **Patient Lookup** menu also has all the regular ways to search for a patient.

Select the patient you wish to merge the current one with and you will now see the previous **Merge Patient** screen with additional details of the patients to be merged

	Merge Patient			
MRN 3445 Patient TESTER, T e	DOB 01/01/1990	Gender Male		
Select a medical record where the patient above will be merged into. This mean MRN 3445 will not longer exist and all appointments/episodes and invoices will be moved into the selected MRN below.				
	Q test			
	Merge into			
MRN 3446	DOB 01/01/1990	Gender Male		
Patient TESTER, Test				
		Merge Cancel		

Ensure the patients being merged are correct, as this process cannot be undone if an error is made.

Now click the green **Merge** button, and you are all done! The patients have now been merged.

Should you try to **merge** two patients with **differing** details, Fydo will stop you with the following error message.

As you can see, the patients here have differing **Date of Births**, so Fydo will not let me merge them.

The Audit Log

The **Audit Log**, is a log Fydo stores to keep track of which user has performed which action. In the case of merging, we will be able to see which user has performed the merge, as well as the details of said merge.

To access the Audit Log, first select Settings

Then \boldsymbol{Logs} from the menu

Logs

You will now see the **Audit Log:**

Usemame	Message	Date Created
Michelle Romero	Login – Michelle Romero	08/05/2020 1:34:44 PM
Michelle Romero	Patient Merge - Test TESTER - MRN: 3445 merged into MRN: 3446. MRN: 3445 will no longer exist.	07/05/2020 4:23:30 PM
Michelle Romero	Login – Michelle Romero	07/05/2020 1:25:55 PM

This screen shows us some important information such as:

- Username: The user who performed the action
- Message: What happened, in the above case we have some logins and the patient that was merged.
- Date created: The date this action happened, as well as the time.

If you ever need to confirm what has happened in Fydo, the Audit Log is the perfect place to check.
